

## **Doug Brophy – OCNI Board – Re-election**

<https://www.linkedin.com/in/dougbrophy/>

Doug Brophy has been part of the Canadian nuclear industry for nearly 29 years, originally starting with Atomic Energy of Canada Ltd in 1992, continuing with SNC-Lavalin for 5 years after their acquisition of the commercial division of AECL, and now with AECOM, leading their business development efforts in the nuclear power sector in Canada. He has been a tireless representative of OCNI's members as a Board Director since 2018 and is very active on many of its committees.

Originally a Chartered Accountant with Deloitte, Doug's roles in the nuclear industry have spanned all areas from Finance to Contracts to Quality Assurance to Marketing, Business Development and Strategic Planning.

He was Financial Controller for AECL's Wolsong 2, 3 & 4, and Cernavoda 1 projects, and its Nuclear Services business. He served as Executive Assistant to AECL's President & CEO for 2 years, traveling globally, promoting AECL's CANDU reactors. He led the successful financing of the Cernavoda 2 reactor in Romania, working closely with EDC and a multitude of Federal Government departments. He then developed and led a new Commercial and Business Operations group responsible for centralizing all proposals and contracts, followed by a lead role on the team for AECL's New Build marketing, creating Team CANDU to pursue their Ontario Market Strategy for new CANDU reactors at the Darlington site. He reported to AECL's COO as Director of Quality Assurance and Operations Improvement. He has negotiated many major commercial contracts, was a lead in the complete revision AECL's Corporate Risk Procedures and was responsible for taking all proposals through the Risk Review process. He was Capture Lead for SNC on the CNEA team that was successful in winning the AECL GoCo (Government Owned, Contractor Operated) contract to manage the operations of CNL.

At SNC, he was Vice-President, Marketing & Strategy, retaining proposals and contract negotiation responsibility, but taking on leadership for Marketing Strategy, Strategic and Operations Planning, and was responsible for all reporting to SNC's Board of Directors, in addition to all financial planning and budgeting.

He currently heads up AECOM's business development efforts in Canada in the Power sector, with a focus on bringing AECOM's deep nuclear experience to benefit the Canadian nuclear industry. He was AECOM's lead in the negotiation of the Unit 6 Fuel Channel and Feeder Replacement contract for Bruce Power. AECOM is also leading the Steam Generator Replacement (SGR), in addition to being Bruce Power's selected contractor for all I&C construction for the next 6 years, and part of the Engineering MATOC MSA.

Doug has a BBA from St Francis Xavier University, and is a Chartered Accountant. He is married with 3 children, has coached at a competitive level in baseball and hockey, and still remains active in many sports, especially golf.
