

L3Harris is a founding member of OCNI and Michael (and his team) has been an active participant in OCNI events, supplier days and trade missions for many years. Michael brings the following attributes to the Board, if elected:

1. The L3Harris division involved with the nuclear power business is based in Montreal, Quebec, so a Quebec dimension is added to the largely Ontario Board membership.
2. Michael has developed business in CANDU and non-CANDU nuclear markets globally. From Canada to Brazil to most parts of Europe to South Africa to Asia, Michael is seasoned in international nuclear business. He hopes to bring his knowledge of international nuclear markets to the Board and contribute to positioning Team Canada in other markets.
3. Michael is known to be direct and open. With these attributes, he will speak freely in Board meetings, representing OCNI members.
4. As a keen enthusiast of marketing and branding, when called upon, Michael will contribute to the professional communications of OCNI.
5. As a person of Indian descent (but born in Bermuda!), Michael will add diversity to the makeup of the Board.
