

I am passionate about Nuclear and am very interested in making a meaningful contribution to the OCNI Board focused on the priorities of the Canadian supply chain and ensuring the maximum benefit to the Canadian Industry.

There are significant opportunities for Canada in the areas of Nuclear Decommissioning as well as Small Modular Reactors and that it is important for the supply chain to be aligned and organized under the right leadership to ensure success.

I would be honoured to serve on the OCNI Board and am looking forward to meeting and speaking to my supply chain colleagues to ensure that your interests are reflected at important discussions both within industry and with our government stakeholders.
