

Mario brings 15 years of experience in progressive leadership roles in project management, business development and engineering. Prior to joining Hatch, Mario worked directly for OPG Nuclear and Suncor Energy. He has been recognized for leading organizations to drive continual improvement and manage risk to deliver sustainable results. He previously served as a board member for the Air & Waste Management Association, where under his leadership as a Director and Vice President the organization increased brand awareness through community outreach, fostered collaboration with government, and increased revenue through memberships and events. In addition to his achievements in the nuclear and consulting industry, Mario has a long track record of volunteer service, including acting as past Vice President for Engineers without Borders (McMaster), member representative for Sarnia Lambton Environmental Association, and a regular volunteer for the United Way. Mario holds an undergraduate degree in Chemical Engineering and a Masters in Engineering from UOIT. He is a licensed Professional Engineer and a Project Management Professional.
