

Fabricia is a young professional working in nuclear and promoting the benefits of nuclear science related fields to external stakeholders, including as a mentor to the Women in STEM Program at OTU. Fabricia is one of nuclear energy's strongest advocates, proactively seeking opportunities to expand our industry's impact, including most recently at the 2020 IAEA Scientific Forum:

As a representative from the young generation of nuclear scientists and engineers, Pineiro said that the nuclear sector is innovating in many areas, including in key industrial processes related to automation and remote operations. This attracts young people to the industry, as “our work has a direct positive impact and gives us a sense of pride and purpose”.
