

CARL DANIEL

Carl graduated from McMaster University with a B.Sc in Chemistry, and from the University of Toronto with a B.A.Sc and an M.A.Sc in Chemical Engineering.

He has 35 years of experience in Canada's nuclear industry, working at Ontario Hydro/Ontario Power Generation for 30 years, and then in the private sector as the Chief Engineer. Carl brings significant leadership, knowledge, and a proven program management track record. He taught and mentored many training programs, including the Senior Nuclear Plant Management.

Carl's extensive portfolio includes management of capital programs for nuclear facilities, including the management of engineering, staff, subcontractors, inspection, and finance for projects in excess of \$150 Million.

Carl participates in many venues that help to improve the nuclear business in Canada. He is currently the chair of the N290A technical committee of CSA, a member of the N286 committee, nuclear funding committee, and a voting member of the Nuclear Strategic Steering Committee.
