

Simona is a recognized nuclear professional with a record of ever increasing technical and leadership experience in plant operations, reactor maintenance and project delivery. Throughout her nuclear career she has been actively groomed for operational leadership. She has obtained her certificate in Advanced Operational Orientation for Managers at Bruce Power, has a Bachelor's in Engineering Physics, a Master's in Environmental Engineering, is a Professional Engineer in the Province of Ontario and a certified Project Management Professional. Simona has successfully delivered complex projects, provided insightful strategic planning, managed regulatory issues and interfaces, managed nuclear plant programs, and participated in leading nuclear plant outages. She has proven herself as an effective communicator and change agent during periods of organizational and programmatic transformation as well as demonstrated her skills in lean performance and continuous improvement (Six Sigma Black Belt).

Over the years, she has sat on several committees focused on strategic goal setting, organizational transformation, leadership development and promoting Equality, Diversity & Inclusion (ED&I).

- She is an active Integrity Ambassador for her company.
- She sits on her company's Executive Committee for Progressive Aboriginal Relations (PAR)
- She represents her company on the Bruce Power Indigenous Relations Supplier Network
- She represents the business and reputational interests of SNCL as the senior most management representative at the BP site. Manages relationships with BP executives and sets direction to the local Port Elgin office.

Simona has over 20 years of managing staff and performance in various capacities. She also serves as a mentor to younger talent and has earned a reputation of an always available active listener empathetic to others and offering objective, practical advice for career growth.
