

I'm a qualified and well-prepared candidate for a position on the OCNI BOD with a great deal to contribute. I have been a passionate promoter and champion for the nuclear industry for as long as I can remember. I chose science – nuclear physics in particular - because I found it fascinating. And in many ways reassuring...science doesn't lie, science is something you can count on. It is reliable just as the CANDU reactor. I am very proud to represent SNC-Lavalin– the stewards of the CANDU design. As a Board member, I pledge to be a voice of reason, a voice that speaks with integrity and educates others through the power of truth, facts and clarity of vision. Ultimately, our goal is to bring people together and grow a stronger brand for the industry. For me it is also about growing the local economy and strengthening our community through nurturing relationships, education and opportunity. There is so much potential, so much to do and so much to build – I can't wait to get started!
