

ERIC LLOYD

Sunny Corner Enterprises Inc. (SCEI) has been in business for 58 years and is a well-respected industrial contractor and fabricator for the Point Lepreau Nuclear Generating Station. SCEI has successfully retained the maintenance and projects contract at Atlantic Canada's only nuclear generating station for the past 14 years. As the President of SCEI, I am passionate and committed to the future of nuclear energy and would enjoy the opportunity to contribute to this industry's growth and innovation and to contribute to the ONCI mission of providing initiatives to support our members domestically and internationally. There is a wonderful national and global opportunity for our members, and I see participating on the ONCI Board of Directors as a great way to contribute to our industry's future. I believe my experience and leadership guiding SCEI over the past five years combined with my unique regional perspective in this industry would allow me to contribute to the ONCI vision to drive and strengthen a thriving Canadian nuclear supply chain. I thank you for your time and consideration.
