

**Jennifer Wong**

Jennifer Wong is the National Power Generation Leader at Accenture, advising utilities on business strategy, digital transformation, and operational excellence. With over 20 years in the nuclear industry, she has held senior leadership roles in Engineering, IT, and Capital Projects, contributing to major initiatives including Pickering Safe Storage, Darlington Refurbishment, and SMR New Build. She serves as Plenary Co-Chair of the Canadian Nuclear Society's Disruptive, Innovative, and Emerging Technologies Committee and is a former advisor to the Canadian Standards Association on cyber security and technology adoption. Jennifer also brings governance experience as a Board Member and DEI Chair at an independent girls' school. She is a licensed professional engineer and holds a B.A.Sc. in Electrical Engineering from the University of Toronto.

I am seeking election to the OCNI Board to contribute my experience and passion for advancing Canada's nuclear industry. With over 20 years across Engineering, IT, and Capital Projects, I now serve as National Power Generation Leader at Accenture, advising utilities on energy transition, digital transformation, and operational excellence. My background spans both nuclear and the broader energy sector, combining technical expertise with business leadership—a valuable perspective as nuclear expands into new areas such as data centres and Canada's clean energy transition. I bring governance and industry experience through my roles with Canadian Nuclear Society committees, CSA standards development, and as a Governor at an independent school. Across these, I have focused on fostering innovation, building partnerships, and developing talent. If elected, I will prioritize:

- (1) strengthening Canada's supply chain to build capacity and resilience for future nuclear growth,
- (2) developing talent to attract, mentor, and empower the next generation of nuclear professionals, and

(3) driving innovation and collaboration to keep our sector globally competitive.

With your support, I hope to bring my cross-sector experience and commitment to innovation and talent development to the OCNI Board, helping drive our industry forward together.
