OCNI Welcomes 10-Year Strategic Alliance Between Bruce Power and Contro Valve Aiming to Strengthen Canada's Nuclear Supply Chain

Burlington, ON – October 15, 2025 –

The Organization of Canadian Nuclear Industries (OCNI) proudly joined Bruce Power, and Contro Valve today to celebrate the signing of a 10-year strategic alliance agreement aiming to reinforce Ontario's clean energy future and support long-term economic growth across Canada's nuclear supply chain.

The announcement, made at Contro Valve's Burlington facility as part of OCNI's Supplier Engagement Series, highlights the essential role that trusted Canadian suppliers play in advancing clean, reliable, and affordable nuclear energy.

"This agreement is an excellent example of collaboration and innovation within Canada's nuclear supply chain," said **Ivette Vera-Perez, President and CEO, OCNI**. "OCNI's members, like Contro Valve, are essential to keeping Ontario's reactors operating safely and efficiently while driving high-quality, local employment and supporting Canada's transition to a clean energy economy."

Under this agreement, Bruce Power and Contro Valve will work together to provide critical valve and control solutions for the company's long-term operations and refurbishment projects. The alliance is expected to generate over \$10 million in investment over the next decade, securing local jobs and ensuring equipment reliability across Bruce Power's facilities, which supply 30% of Ontario's clean electricity.

"Bruce Power is proud that 95 per cent of our spending is in Canada," said Pat Dalzell, Vice-President, Corporate Affairs and Operational Services. "We're strengthening our domestic supply chain and Ontario's economic growth, and this alliance agreement is part of that commitment."

“We are proud to partner with Bruce Power under this new 10-year alliance,” added Chris Tremblay, Nuclear Manager, Contro Valve. “Our team in Burlington and across Canada remains committed to delivering the high-quality valves, instrumentation, and local service that enable the continued safe and efficient operation of Ontario’s nuclear fleet.”

Local government and community leaders welcomed the announcement, highlighting the significance of this partnership for Burlington and Ontario’s clean energy future.

“This made-in-Ontario agreement will secure great jobs, boost our economy, and contribute directly to a cleaner energy grid,” said Hon. Karina Gould, Member of Parliament for Burlington and Chair of the House of Commons Finance Committee.

“Burlington is proud to be home to companies like Contro Valve that are advancing clean energy and supporting skilled local employment,” said Marianne Meed Ward, Mayor of Burlington.

About the Organization of Canadian Nuclear Industries (OCNI)

The **Organization of Canadian Nuclear Industries (OCNI)** is the leading voice of Canada’s nuclear supply chain, representing over 260 companies that provide engineering, manufacturing, and technical services to the Canadian and international nuclear markets. OCNI promotes the production of safe, clean, and dependable nuclear power and fosters collaboration, innovation, and workforce development across the industry.

About Contro Valve Equipment Inc.

Contro Valve is a leading Canadian supplier of valve assembly, instrumentation, and analytical integration, serving the nuclear and industrial sectors from five locations across Canada. As a Channel Partner for Dresser Baker Hughes, Contro Valve provides critical equipment and expertise that ensure the safe, reliable, and efficient operation of Canada’s nuclear facilities.

About Bruce Power

Bruce Power is a Canadian-owned partnership based in Bruce County, Ontario, producing 30% of Ontario’s electricity and contributing billions of dollars in economic activity each year. The company is advancing clean energy solutions and creating long-term employment across Ontario while also supplying life-saving medical isotopes globally.

Quotes

"Contro Valve's 10-year alliance with Bruce Power is a shining example of how strategic partnerships in the nuclear sector can drive local economic growth and long-term, high-quality employment. Nuclear energy remains one of the most critical industries in Canada, and we must continue to prioritize its development and the skilled workforce behind it. I'm proud to celebrate this important milestone with Contro Valve and look forward to their continued success as part of the Bruce C expansion project." *[Hon. Karina Gould, MPP]*

"Contro Valve's leadership and expertise in their field plays a key role in advancing Canada's nuclear energy sector, and we're proud they call Burlington home. This long-term partnership with Bruce Power supports clean energy, strengthens our local economy, and aligns with Burlington's commitment to becoming a net carbon neutral community by 2050."
[Mayor Meed Ward, Burlington]

"Contro Valve's 25-year legacy of excellence exemplifies the strength of Canada's nuclear supply chain. OCNI is honoured to highlight their achievements and continued partnership with our members."
[Ivette Vera-Perez, President & CEO, OCNI]

"This milestone—marked by a new 10-year alliance agreement with Bruce Power and the special recognition from OCNI—reaffirms Contro Valve's role as a long-term, trusted partner in the Canadian Nuclear Industry. Our dedicated, expanding team in Burlington, built on 25+ years of expertise, is ready to deliver the high-quality, critical valves, instrumentation and local support essential to the next generation of safe and reliable nuclear power in Ontario."
– *[Chris Tremblay, Nuclear Manager, Contro Valve.]*
