

## NEWS RELEASE

### FOR IMMEDIATE RELEASE

**Mississauga, Ontario – November 27, 2025** – The Organization of Canadian Nuclear Industries (OCNI) and Bruce Power hosted a Supplier Engagement Event on 27 November to highlight the work of Pacer Precision Logistics and recognize its critical contributions to Canada's nuclear and life sciences sectors.

For over two decades, Pacer has been a trusted name in the transportation of Class 7 radioactive materials, isotopes, and other regulated nuclear cargo, ensuring shipments are handled with precision and in full compliance with domestic and international standards. Pacer's operations have also expanded to support the growing life of sciences and nuclear medicine industries. Their advanced logistics network enables the secure and timely movement of isotopes and temperature-sensitive materials used directly in patient care, cancer treatment, and vital research applications.

"Canada's nuclear supply chain is built on a foundation of trust, innovation, and safety. Pacer embodies all three," said Ivette Vera-Perez, OCNI President and CEO. "Their dedicated team works to ensure that critical materials reach their destinations safely, whether powering reactors or supporting life-saving healthcare applications. OCNI is proud to recognize their contribution to Canada's clean energy and health innovation ecosystem."

The event featured remarks from City of Mississauga Councillor Natalie Hart, Melody Graeve, executive Director & Vice President, Government Relations, CNIC, and Micheal Krupnikov-Prieto, Executive Assistant of MPP Deepak Anand. Speakers and participants were provided a guided tour of Pacer's 75,000 sq. ft. facility that features unique and innovative capabilities enabling Pacer to support Canada's growing nuclear and life science's needs.

### Part of the OCNI Nuclear Supplier Event Series

This event forms part of OCNI's Nuclear Supplier Event Series, a national initiative celebrating the achievements of Canada's nuclear suppliers and fostering collaboration between industry, government, and community leaders. The series highlights companies that exemplify innovation, sustainability, and excellence within the nuclear supply chain—reinforcing Canada's position as a trusted global leader in nuclear technology, safety, and clean energy advancement.

### Industry and Community Quotes

“Ward 5 is home to some of Mississauga’s most innovative and forward-thinking companies, and Pacer Precision Logistics is a strong example of that leadership. The recent advancements at their facility, ranging from enhanced temperature-controlled storage to improved compliance and specialized handling systems, demonstrate a deep commitment to safety, excellence, and the future of nuclear-related transportation.

I want to acknowledge the partnership between OCNi, Bruce Power, and Pacer Precision Logistics, and the important role they collectively play in supporting the safe movement of Class 7 materials and medical isotopes that are critical to diagnosing and treating life-threatening conditions. Mississauga is proud to be part of the broader network that strengthens Canada’s nuclear supply chain, drives innovation, and supports good jobs in our community.” **Councillor Natalie Hart**

“Ontario has built one of the most reliable and innovative medical isotope supply chains in the world, and Bruce Power is proud to play an important role within that network by producing cancer-fighting isotopes. Ensuring these isotopes reach patients safely and on time requires strong partnerships, and Pacer Logistics is an essential part of that process. Their expertise and commitment help deliver critical treatments to people who need them most.” **Chad MacLean, Senior Director, Business Development, Bruce Power**

“We are truly honored to be recognized by OCNi and Bruce Power. To the Pacer team, this work is personal. Every radioactive shipment, every isotope delivery, every temperature-sensitive package represents someone, patients waiting for treatment, researchers pushing boundaries, and communities relying on critical innovations. Our team has taken that responsibility to heart.

We have built Pacer on key foundations - precision, safety, quality and trust, but also on partnership. We see ourselves as an extension of the incredible nuclear and life sciences organizations we serve. As these industries evolve and Canada’s leadership grows, we are committed to advancing logistics solutions through innovation that are not only compliant and secure but support the people and innovations moving our country forward.” **Giovanna Ippolito, Managing Director, Pacer Precision Logistics**

#### About Pacer Precision Logistics

Pacer Precision Logistics is a Canadian leader in specialized logistics solutions, serving the nuclear, life sciences, and regulated transport sectors. With ISO-certified systems, a team of highly trained professionals, and a network of vetted Class 7–certified drivers, Pacer delivers critical shipments safely and efficiently across North America. From advanced temperature-

controlled storage to secure radioactive material transport, Pacer's commitment to precision and compliance makes it a cornerstone of Canada's nuclear and life sciences supply chain.

#### About OCNI

The Organization of Canadian Nuclear Industries (OCNI) is the leading trade association representing over 250 suppliers to the Canadian and global nuclear industry. OCNI supports its members through advocacy, business development, workforce initiatives, and international partnerships that strengthen Canada's leadership in clean energy, safety, and innovation.
