About OCNI

The Organization of Canadian Nuclear Industries (OCNI) is the leading voice of Canada's nuclear supply chain, representing a diverse network of companies that drive innovation, economic growth, and technological advancements in the industry. Through strategic partnerships and industry engagement, OCNI supports the development of a strong, competitive, and globally recognized nuclear sector.

Clean Energy. Strong Economy.

OCNI Board of Directors

Lisa McBride - GE Vernova (Chair)

Tanya Bodioga - Framatome Canada Ltd. (Vice-Chair)

Mimi Ginger Wilde - Hatch Ltd. (Treasurer)

Ted Betts - Gowling WLG (Canada) LLP (Secretary)

Michael Chatlani - L3Harris MAPPS

Shane Chegahno - Makwa-Cahill LP

Jacqueline Cherevaty - BWXT Canada Ltd.

Adrian Davies - Candu Energy Inc., an AtkinsRéalis company

Iftikhar Haque - Terrestrial Energy

Emma Hauch - Nuvia Canada

Ritu Malhotra - March Consulting Associations Inc.

Louie Shoukas - PCL Nuclear Management Inc.

Ed Veckie - Unified Engineering

David Tanel - Westinghouse Electric Canada

Jennifer Wong - Accenture Inc.

Message from OCNi President and CEO, Ivette Vera-Perez

It is my pleasure to present the 2026 OCNi Member Directory at a defining moment for Canada's nuclear supply chain.

Ontario alone is projected to require more than 17,000 MW of new nuclear capacity by 2050 to meet growing electricity

demand and decarbonization goals. Major projects already underway or announced — including Darlington New Nuclear, Bruce Power's Major Component Replacement, Pickering refurbishment, and proposed new builds — represent tens of thousands of skilled jobs annually and generational economic opportunity.

Across Canada, provinces including New Brunswick, Saskatchewan, and Alberta are advancing or evaluating both small and large nuclear deployments to support grid reliability, industrial decarbonization, and long-term energy security. Nuclear expansion is no longer regional; it is national.

At the same time, the industry faces real capacity pressures. Today, just 40% of the nuclear workforce is under the age of 40, and approximately 90% of roles require high-skill expertise. Strengthening and expanding our supply chain — while preparing the next generation of skilled workers — is essential to fully realizing the opportunity before us.

OCNi represents a diverse and highly capable ecosystem of more than 250 companies — from small and medium-sized enterprises and women- and Indigenous-owned businesses to globally recognized Tier 1 suppliers. Together, our members form one of the most experienced nuclear supply chains in the world.

Our Strategic Plan 2025–2028 sets a clear course forward. Grounded in our mission to deliver measurable value to members, we are focused on five priorities:

Delivering tangible business value to our members as our overarching mission

Strengthening **Connection** across utilities, governments, and partners

Expanding industry **Capacity** to meet growing project demands

Enabling **Global Reach** for Canadian suppliers

Advancing focused **Advocacy** to support competitiveness and long-term growth

Our vision is clear: an innovative, sustainable, and globally competitive Canadian nuclear supply chain at the heart of clean energy, economic development, and energy security.

Pictured Left: OCNi President and CEO Ivette Vera-Perez and OCNi Board members tour McMaster University Labs

This directory reflects that capability — the depth, diversity, and readiness of Canadian companies prepared to deliver on one of the most significant clean energy expansions in our history.

Thank you to all our members for your continued leadership and collaboration. Together, we are strengthening Canada's nuclear supply chain for the benefit of our members, our communities, and generations to come.

In closing, thank you for taking the time to provide your input and advertising. Thank you to all those companies who have been members of OCNi in past and welcome to those who will see the benefits of joining an organization that is excited about the future and focused on playing a key role to ensure the benefits of nuclear continue to be realized across our country and the world.

Thanks to you, only in this directory can somebody access the full strength and breadth of the Canadian nuclear supply chain.

Sincerely,

Ivette Vera-Perez
President and CEO, OCNi

A black and white photograph of three Bruce Power workers walking through a large industrial facility. The workers, two women and one man, are wearing hard hats, safety glasses, and dark coveralls. In the background, a large Canadian flag is visible, along with complex industrial piping and structures. The scene is brightly lit, and the floor is reflective.

Canadian *at our* core.

At Bruce Power, being Canadian is at the heart of who we are. As a proudly Canadian-owned company, we are committed to providing safe, reliable power to Ontario and cancer-fighting medical isotopes globally. We also help to drive the economy, with 95 per cent of our spend in Canada and a robust nuclear supply chain in communities across Ontario.

OCNI Team Message

OCNI's strength lies in its people — a dedicated team working hand-in-hand with members to build and deepen Canada's nuclear supply chain. Guided by our core pillars and values, we cultivate collaboration, fuel industry growth, and advocate for policies that unlock innovation and opportunity.

As the nuclear sector evolves, so does OCNI. We continue to broaden our network, sharpen our resources, and open new doors for our members. Though our team is lean, our commitment is anything but — we are steadfast in advancing an industry that positions Canada as a world leader in clean energy and medical isotope production.

Our Vision: To be an Innovative, sustainable, and globally competitive Canadian nuclear supply chain at the heart of clean energy, economic development, and clean energy.

Our Mission: To deliver measurable value to members by facilitating business growth, revenue opportunities, and strategic partnerships across Canada's evolving nuclear ecosystem and high-potential international markets.

Guided by our core values of **Service Excellence, Integrity, Collaboration, and Equity, Diversity, and Inclusion**, our team is committed to supporting our members and driving the continued growth of Canada's nuclear supply chain.

Membership Categories

OCNI's 2026 Member Directory is designed in an easy-to-navigate format to effectively showcase our more than 250 member companies. This valuable resource serves members, industry leaders, and policymakers by providing clear and accessible information on Canada's nuclear supply chain.

The Categories can be found as followed:

- **Full Members** -are companies who are a supplier, or potential supplier, of goods or services to the Canadian nuclear industry.
- **Supporting Members**- are organizations with an indirect interest in the Canadian nuclear industry such as business alliances, support services, training and educational institutes and other not-for-profit nuclear adjacent companies.
- **International Supporting Members**- are a supplier, or potential supplier, of goods or services to the Canadian nuclear industry and have permanent, verifiable addresses outside of Canada.

WHY OCNI

- **Exclusive Industry Access:** Engage with key industry players, decision-makers, and government officials, gaining insights and strategic connections.
- **Global Reach:** Through our trade missions, international partnerships, and advocacy, we elevate Canadian expertise on the world stage.
- **Innovative Programs & Events:** Participate in high-impact events, supplier days, training, and networking opportunities tailored to your needs.
- **Advocacy & Influence:** Benefit from OCNI's active role in shaping policy and fostering an environment where nuclear energy thrives.
- **Support for Industry Talent:** Access a wealth of resources and programs that focus on workforce development, ensuring your team is ready to meet tomorrow's challenges.

Aberfoyle Metal Treathers Ltd.

We are a commercial Heat Treating and Blast & Coating company located near Toronto, Ontario, Canada.

With a focus on large-scale processing, we service a wide range of industries including aerospace, nuclear power, hydroelectric, petrochemical, mining, steel mills, foundries, construction and heavy machinery.

We specialize in the following Heat Treating processes:

- Stress Relieving
- Normalizing
- Quench & Tempering
- Solution Annealing

Our Blast and Coat facility offers a diversity of coatings:

- Alkyd Enamels & Primers
- Epoxy High Build
- Norganic Zinc
- High-Heat Coatings
- Tank Linings

We are also affiliated with a sister company that offers specialized commercial baked coatings.

Whether your job is large or small, our ISO 9001 - certified facilities offer a full range of capabilities, making AMT the ideal choice for outsourcing your heat treating, blast & coating needs.

Accenture Inc.

Accenture is a leading global professional services company that helps the world's leading businesses, governments and other organizations build their digital core, optimize their operations, accelerate revenue growth and enhance citizen services—creating tangible value at speed and scale. We are a talent- and innovation-led company with 799,000 people serving clients in more than 120 countries. Technology is at the core of change today, and we are one of the world's leaders in helping drive that change, with strong ecosystem relationships. We combine our strength in technology and leadership in cloud, data and AI with unmatched industry experience, functional expertise and global delivery capability. Our broad range of services, solutions and assets across Strategy & Consulting, Technology, Operations, Industry X and Song, together with our culture of shared success and commitment to creating 360° value, enable us to help our clients reinvent and build trusted, lasting relationships. We measure our success by the 360° value we create for our clients, each other, our shareholders, partners and communities. Visit us at accenture.com.

Actalent Services

Actalent supports critical engineering and sciences initiatives that advance how companies serve the world. A consolidation of two leading engineering and sciences brands, Actalent has almost 40 years of experience driving scale, innovation, and speed to market for some of the world's most visionary companies. Our solutions range from contract and managed talent to engineering and sciences services, enabling distinct solutions that solve business challenges.

We currently support the nuclear industry with expert consultants across project management, construction management, engineering, and more. Actalent is an operating company of Allegis Group, the global leader in talent solutions, and is a division of Aerotek ULC Canada.

ADEXFLOW INTERNATIONAL

Adexflow was created in 2005 in France to provide software solutions and a high expertise worldwide for the nuclear industry. Our specialty is covering the management, the control, the qualification and the security of digital data transfers between existing software, even if they are incompatible, and used by the different actors from the design to the decommissioning phases. In 2015, ADEXFLOW was relocated to Canada to cover a contract made with the US navy. ADEXFLOW has been involved in several Nuclear Power plan projects such as CANDU (AECL), AP600/AP1000 (Westinghouse, Ansaldo) N4 (EDF), EPR (EDF, ENDEL), Hinkley point ITER to name a few.

The ADEXFLOW expertise has been extended to CAD, ANALYS SOFTWARE (PIPESTRESS), laser acquisition e.t.c

AECOM Canada Nuclear Services Inc.

AECOM Nuclear Services is a part of AECOM, a global infrastructure consulting firm. This division is dedicated to addressing the unique challenges and opportunities within the nuclear sector, including power generation, decommissioning, waste management, and environmental restoration. Some key areas of expertise of AECOM Nuclear Services:

- **Nuclear Power Plant Services:** supports the design, construction, and maintenance of nuclear power plants and provides engineering solutions for safety, efficiency, and compliance with regulatory standards.
- **Decommissioning and Decontamination:** supports clients in safely shutting down and dismantling aging or non-operational nuclear plants and manages radioactive materials and environmental restoration.
- **Waste Management:** specializes in the handling, treatment, and disposal of nuclear waste and employs advanced technologies to minimize environmental impact and long-term containment.
- **Environmental Remediation:** conducts site assessments and remediation to address contamination from nuclear activities and facilitates compliance with environmental regulations while promoting sustainable practices.
- **Regulatory and Safety Compliance:** provides consulting and advisory services to help clients navigate complex nuclear regulations and emphasizes safety protocols and risk management to protect workers, communities, and the environment.

Certifications: ISO 9001, CSA N299.1 (Category 1), CSA N299.2 (Category 2), CSA N299.3 (Category 3), CSA N299.4 (Category 4), CSA N286.7 (Nuclear Quality Assurance)

Aecon Nuclear

Aecon (TSX: ARE) is Canada's premier construction led industrial EPC and infrastructure development company, with 12,000 employees and over CAD \$3B in revenue delivering strategic projects and providing integrated turnkey services to nuclear industry for the last 50+ years.

Spanning five decades and more than 400 nuclear energy projects, Aecon Nuclear's portfolio of building, refurbishing, maintaining and decommissioning nuclear power facilities reflects a record of project success that ranges from small but essential maintenance contracts to major construction endeavors.

The acquisition of Wachs Technical Services in South Carolina, USA further complemented Aecon's capabilities and extended reach to the nuclear industry in the USA. Aecon Wachs combined unparalleled experience and track record of success for the state-of-art welding, fabrication, new construction, maintenance, outage management, and decommissioning services has made Aecon a reliable strategic partner for your nuclear projects.

Agilus Work Solutions

Agilus Work Solutions (Agilus) is the largest Canadian, privately-owned, full-service recruitment company in the country, and a Platinum member of Deloitte's Canada's 50 Best Managed Companies for 24 consecutive years. Our mission is to serve our candidate and employer networks to lead a connected, forward-thinking work community, covering all professionals, across Canada. Our history spans over 46 years. Founded as Design Group Staffing Inc. the company has grown organically and through several acquisitions. Our growth has helped us take the lead in the areas of Engineering & Technical, Information Technology (IT), and Professional Services. Our vision is to be Canada's number 1 staffing and recruitment partner, and we are well on our way. In addition to being the largest Canadian, privately-owned, full-service recruitment company, we are the 6th largest overall as per SIA (Staffing Industry Analysts - the global advisor on staffing and workforce solutions). We have been recognized as the number one provider of engineering talent in the country, and our office professional and information technology verticals fall in the top 10. Our client portfolio extends across Canada with a long-established presence in Oil & Gas, Energy, Mining, Engineering, Construction and Advanced Manufacturing.

Alberici

Alberici is a diversified construction company that partners with leading organizations throughout North America to build their most challenging and important projects.

Our clients bring us their boldest, most complex challenges. They bring us what everyone says is impossible. And we bring the vision, talent, and expertise to get it done. Because that's how we're built.

Alberici has a strong resume in the nuclear sector, both in the U.S. and Canada. Representative projects include the MOX Fuel Facility at Savannah River, various projects at Bruce Power, OPG's SB-3 Nuclear Waste Storage Facility and work on Southern Company's Plant Vogtle. Our approach delivers a high level of safety, schedule and cost performance in very challenging work environments. ISO 9001:2015, CSA B51 and CWB W47.1 certifications demonstrate our dedication to quality construction.

Alithya Digital Technology Corporation

Alithya (NASDAQ: ALYA; TSX: ALYA) is a leader in strategy and digital technology, with professionals in Canada, the US, and internationally. Our integrated offering positions us as a leading digital technology partner, highly skilled in designing innovative and efficient digital solutions for business challenges. For over 40 years, Alithya has been a trusted advisor to the nuclear industry based on our long-term partnerships with customers and deep domain expertise.

Alithya is positioned to help our customers overcome the challenges of tomorrow by combining our unique mix of Engineering and IT capabilities to enable our customers to overcome challenges in IT/OT convergence, digitalization, modernization, and cybersecurity. Our expertise spans from the control room to the boardroom, helping our customers achieve success on projects ranging from safety-critical shutdown systems and reactor control systems to enterprise IT applications and work management systems. In addition, Alithya has built innovative products and is well positioned to help customers with modernization/digital transformation of their software systems using technologies, such as cybersecurity, Internet of Things (IOT), Artificial Intelligence (AI), and Robotic Process Automation (RPA).

Alps Welding Ltd.

since 1974

Alps Welding Ltd.

For 50 years, Alps Welding has been fabricating custom process equipment for customers throughout North America and globally. We are an authorized **CSA B51, ASME "U" and "R", B31.1, B31.3** fabricator, with a comprehensive, audited QA program.

We have deep experience manufacturing a variety of equipment for the Power industry, including:

- Pressure vessels and storage tanks
- Heat exchangers
- Piping
- Skid-mounted systems and modular plant
- Custom fabrication

Our Engineering capabilities include mechanical design and detailed fabrication drawings:

- AutoCAD Mechanical
- 3D modelling and FEA utilizing SolidWorks
- Pressure Vessel design with COMPRESS
- Design registration with Canadian Registration Number (CRN)
- Dedicated Engineering Project Manager with live scheduling and progress reporting

We form long-term partnerships with customers, use technology to access and respond to bid packages and are responsive to tight timelines. We are accountable and reliable, delivering your requirements on time, and at a competitive cost.

AlumaSafway Inc.

AlumaSafway has been an integral part of the nuclear industry for over 25 years and are committed to developing a culture where environmental health and safety are its core values, which are adopted and practiced throughout all levels of the organization. AlumaSafway is a major service provider for maintenance, capital projects and decommissioning activities for:

- Scaffold and Access Solutions
- Insulation
- Coatings
- Specialty Mechanical Services

Our robust workforce and project planning tools, such as BrandNet 3D Drawing, BOM, and Scaffold Request forms, along with our managed access programs, offers a level of granularity afforded by our project management systems to ensure continuous improvement and focus to meeting on time and on budget. Currently, AlumaSafway is the only scaffold company in Canada with a N286 & N299.1-4 Quality program.

Armo-Tool Limited

Armo provides design and build of fixtures, tooling, guarding and custom dunnage for the manufacture of components used in the nuclear industry. We have successfully delivered multi-year projects with evolving design requirements. Our deep vertical integration allows successful completion of complex quality with challenging timelines. In addition to cost effective manufacturing of tooling, we also provide design for manufacturing support which has helped customers trim unnecessary costs. Beyond the money saved, timelines have also been accelerated for instance when a custom casting was replaced with a machined assembly. We bring in-house capabilities from mechanical and electrical design to CNC machining up to 4 meters, EDM, laser cutting and fabrication. Project managers use strong project management software with a combination of off the shelf and proprietary capabilities. In business since 1969 we have the track record and stability to be a long term partner. With 200 skilled team members we also have the size to deliver on substantial projects.

ASC Engineered Solutions, LLC

ASC Engineered Solutions' history stretches back to the mid 1800's, providing the finest quality pipe hangers and hardware. Since the early days, ASC, has expanded its portfolio and the markets it serves. Today, under its Performance Products & Services (PPS) Division, ASC focuses to keep plants, operations, and processes, up and running, streamlining the design, engineering, procurement, installation, and service/repair of pipe support components. The ASC's PPS Division consists of two business units: Anvil EPS – providing engineered pipe supports, hydraulic snubbers, engineering and associated fabrications; and Basic-PSA – providing mechanical snubbers. ASC's Field Service Department provides system walkdowns, visual inspections, fully equipped trailers to support in-field snubber overhauls and testing. ASC is positioned to provide a clear "one stop shop" solution, delivering the best combination of world class engineered pipe support products and services.

B

BFC Technologies Inc.

With its extensive knowledge across multiple industrial sectors, coupled with best practices, the latest technologies and research available allow BFC to provide fluid handling solutions for the unique challenges faced by its clients. BFC is a process-centric company, providing complete solutions from concept through commissioning. BFC's experience includes working with:

- Sub-critical and super-critical refreshing loop systems (650°C, 25MPa, 0.5-200mL/min)
- Single and two-phase flow processes
- Specialty fabrication materials such as Titanium, Hastelloy-C, Inconel, and Zirconium
- High velocity decontamination loops (10m/s, 150°C, 1.5MPa)

BFC also has the expertise to design and build effluent treatment systems (filtration, neutralization, and centrifugal separation). BFC is certified to ISO 9001:2015 standard.

With complete end-to-end capabilities under one roof, BFC leverages its multi-functional, cross-trained project teams to deliver a more robust product through its unique hands-on approach.

Black and McDonald

Since 2006 Black & McDonald has established itself as a leader in nuclear construction services. We provide multi-trade, single sourced capability backed by a clear mandate for responsibility and accountability. Our resources remain committed to our founders' philosophy to "do the job right ... regardless". When there's Zero Tolerance for error, nuclear operations look to Black & McDonald to ensure Best Practices are utilized for safety, quality, human performance and production. As a result, Black & McDonald has developed into an industry leader. We are committed to rigorous adherence to our safety and managed governance systems which integrate seamlessly with our nuclear customers. Many of our operations present risks to people and the environment, and we believe the most effective way to meet our commitment is through a competent, committed workforce and practices designed to ensure the resultant risk is effectively and proactively managed.

Brotech Precision CNC Inc.

Brotech manufactures the highest precision components for the most critical nuclear applications using CNC machining technology and leading edge software. With 30,000 sq. ft. of space and 25 CNC machines, Brotech continues to supply small to medium size parts and components to the nuclear industry in Canada.

Brotech services customer partners using 5-axis mills, Multi-Axis CNC lathes including two 9-axis Integrex lathes, and other machine tools. Our 4 CMMs can inspect our precision machining to .0001" in size or position. Brotech has been manufacturing difficult metal components for the nuclear industry since 1995 and has been a contributor to various refurbishment projects during this time. Over the past 23 years, we have earned a reputation for providing solutions to difficult precision parts in a quick and cost effective manner and have a complete network of supply chain partners to seamlessly deliver turn-key finished components.

BWM Industrial Automation

BWM is a custom jobbing shop offering services in machining, welding, and fabrication to multiple sectors of the economy including nuclear power generation, experimentation, testing, health care isotopes, and disposal.

We also have an automation division, BWM Industrial Automation, that provides custom automation equipment in a complete turn-key manner. BWM focuses on the manufacture of custom components from small items you can hold in your hand, to part sizes of 100 tons or more. We have manufactured many items for the nuclear industry including waste containers, shielding, reactor components, items used for testing and experimentation, and structural items used in isotope processing rooms.

BWM Industrial Automation has manufactured and installed multiple material testing devices for reactor components, automated fuel processing lines and workstations, and retooled existing processing equipment. Both BWM and BWM Industrial Automation are supported by an internal engineering group, an electrical and controls group that includes robotic, PLC, and HMI programming, mobile installation and repair teams, and a highly experienced project management group.

CADRE Staffing Inc.

Cadre is an Engineering Services group involved in the provision of Technical staff on a contract and permanent basis. Founded in 2004, one of Cadre's first clients was Atomic Energy of Canada Ltd, in the supply of Engineering, Design and Technical staff for the CANDU 6 and ACR programs. The types of roles we facilitated for AECL included Instrumentation Engineers, Structural Engineers, Mechanical Design Engineers, Electrical Design Engineers, I&C Engineers, Piping Designer, Project Controls, Technical Writers, Technical Illustrators to name a few. Currently Cadre supplies Transportation, Heavy industry, Consulting and Power Industries across North America with Engineering staff and we have database of over 16,000 technical professionals. From our perspective, over the next number of years, the Nuclear Industry will be seeing expedient growth in the provision of clean energy and technological advancement such as SMR's driving a critical need for new talent sources. As Cadre has a diversified Industry focus and strong technical knowledge, we have the ability to bring a new pool of qualified technical candidates to support this growth.

Calian

For over 25 years, the Calian Nuclear team has helped to ensure the safety and security of Canada's nuclear infrastructure. This approach has resulted in full participation in hundreds of projects serving the nuclear industry and all levels of government, both in Canada and internationally.

Our team provides services in the following core areas:

- Environmental protection and impact assessments
- Licensing and regulatory support
- Emergency preparedness and response
- Nuclear safety analysis
- Decommissioning and waste management
- Project management and controls
- Systems engineering and robotics

Camfil Canada Inc.

Camfil is a leading manufacturer of premium clean air solutions. We provide Safety and Protection systems for air filtration and air pollution control, that improve worker and equipment productivity while minimizing energy and protect the environment. Camfil has been providing solutions for nuclear power plants since the early 1960s. Today, we are the global leader in nuclear particulate and gas-phase filtration with experience from more than 90 plants around the world, including the supply of key equipment and filters used in several landmark nuclear decommissioning and waste management projects. Nuclear-generated power is becoming increasingly attractive as nations look to reduce their carbon footprint. Safety is a key concern to our clientele and is paramount to us. Camfil offers the finest quality products, produced by world-class professionals in best-in-class manufacturing facilities.

Candu Energy Inc., an AtkinsRéalis company

Candu Energy Inc. has over 70 years of global nuclear expertise, delivering nuclear technology products and full-service solutions to nuclear utilities around the world. Candu Energy Inc. is the steward of CANDU® nuclear technology, operating on four continents, and provides advisory and engineering services to other nuclear developers. With an innovative technology portfolio, including access to over 500 patented solutions, Candu Energy Inc. solves technically complex challenges across the whole nuclear lifecycle from design and new build through asset management and from life extension and late life management through decommissioning. CANDU technology also allows for the co-production of medical radioisotopes for cancer detection and treatment.

CCNuclear Inc.

CCNuclear is a leading provider and integrator of nuclear services, specializing in the design and fabrication of shielded equipment, advanced tooling, radiological enclosures, protective suits, waste conditioning solutions, volume reduction processes, and field decommissioning services.

Renowned for its efficient management, exceptional safety performance (ISN #400-349000), and technical expertise, CCNuclear plays a strategic role in the nuclear industry. The company is an approved N299.2 and ISO 9001 certified supplier and a licensed General Contractor for on-site services with major Canadian nuclear organizations.

Celeros Flow Technology

Celeros Flow Technology provides a complete range of Class 1, 2, and 3 products and conventional island solutions designed for the stringent reliability needs of nuclear facilities. With SMRs up to 300 MW entering the market, we support designs such as Light Water, Gas Cooled, and Salt or Metal Cooled Reactors.

Our success in civil and naval nuclear power stems from consistently meeting high standards for designing and manufacturing nuclear-coded pumps and valves. Key strengths include in-house software, analytical capabilities, seismic, environmental, advanced R&D, and operability qualification, and a steadfast commitment to quality.

With four coded facilities—Glasgow, Annecy, Burlington, and Houston—certified to ASME "N," "NPT," "NS," 10CFR50 Appendix B, and RCC-M, we excel in innovation. Burlington is Ontario's only ASME-certified pump facility, reflecting our dedication to excellence.

The World's Best Valves®

CGIS

CGIS is the global supplier of the highest performance valves, controls, and automation. With over 40 years of experience, we're committed to understanding the application and ensuring our customers always get the right valve, well before a dollar is spent. With offices throughout Canada and Australia, we serve customers worldwide – on six continents. We offer a unique ability to deliver superior technical expertise in the world of Severe Service Valve (SSV) applications, which improve our customer's reliability, safety, and bottom line in a dynamic and competitive marketplace.

Clavel Quality Consulting Ltd.

Clavel Quality Consulting Ltd. was established in 2014. Provides services in quality management systems development, assessment and training to Canadian and International Nuclear sector.

It is represented by its owner, Ecaterina Clavel who has (almost 40 years) experience in nuclear design, research and development, construction, commissioning, operation of nuclear power plants applied to nuclear power plants including various SMR technologies as well as waste management and decommissioning programs.

Consulting services:

Support regulatory licensing process for management system/QA programs.

Evaluation of management systems and quality programs compliance with Canadian industry needs (CSA N299.1, CSA N286-12 and CSA N286.7).

Quality Audits and Assessments of management systems

Auditing and operational assessments for vulnerabilities- large global companies and small operations. Include evaluation of compliance to the requirements of CSA N299 series of standards, CSA N286-12 and CSA N286.7.

BIG RED OAK

YOU POWER THE FUTURE. WE POWER YOUR STORY.

Strategic marketing and communications
for Canada's nuclear sector

Let's tell your story the way it deserves to be told

 www.bigredoak.com  hello@bigredoak.com

Ontario's Trusted Nuclear Safety Partner

The Technical Standards and Safety Authority (TSSA) plays a critical role in protecting the safety and reliability of nuclear pressure boundary equipment and systems across the province.

As Ontario's Authorized Inspection Agency recognized by the Canadian Nuclear Safety Commission, we work with nuclear utilities and component suppliers to support the long-term integrity of nuclear infrastructure and safe delivery of clean energy through:

- Engineering reviews and component registration
- Inspections, quality audits, and certification
- Supporting modernization and life extension through adoption of emerging technologies
- Training and advisory services
- Standards development and nuclear innovation

DB2 Consulting Inc.

DB2 Consulting Inc. is a Canadian business development and consulting company operating in the Nuclear and Life Sciences sectors. As an ISO9001:2015 registered company DB2 offers a wide range of business development, market analysis, and consulting services.

DB2 Consulting offers business and technical support in the CANDU, SMR, and PWR markets worldwide. With a 10 year history full of success, DB2 has the capability of strategically improving business growth in nuclear markets.

With over \$150 million in sales generated DB2 is effective in winning business for you in the Canadian and offshore markets.

With our American and Chinese partners, based in Oregon, Beijing, and Shanghai, DB2 Consulting Inc. is quickly able to assist your company on your way to the USA and Chinese nuclear markets. With market analysis, business development, NQA1, 10CFR50 AppB and HAF 604 Certification assistance your company will be prepared for entry into the USA and Chinese nuclear markets.

DB2 can also work closely with you to develop business in the European, Argentine, and Korean nuclear markets.

DCS Controls Ltd.

DCS Controls Ltd. is a leading provider of nuclear-grade filtration solutions. Our filtration systems and filtration-related technologies are in-use around the world and across the PHWR, PWR and BWR fleets. Moreover, we are the first-choice supplier for CANDU-specific applications. Our industry-leading reputation for innovation has been earned through the research and development of nanofiber technologies and their applications for nuclear-grade nanofiltration, and our NANO™ series has since extended our capabilities beyond nuclear-grade conventional filtration. From our headquarters in Saint John, New Brunswick, our team is proud to work with operators worldwide to meet their filtration requirements. Whether your needs are high-volume or niche, we welcome you to contact us to learn how our market-leading solutions and unparalleled follow-up support can be put to work for you.

Delta T Heat Exchangers

Delta T Heat Exchangers has supplied custom engineered heat exchangers for cooling and other process applications in Nuclear plants for over 30 years. We supply shell and tube, plate type heat exchangers as well as finned tube heat exchangers.

Common applications include; D20 condensers, reactivation condensers, vault coolers, feedwater heaters, stator water coolers, seal oil coolers, steam coils and cooling coils for ACU's, bearing oil coolers, lube oil coolers, compressor coolers, PHT Motor coolers, Moderator Pump Motor coolers, other large motor coolers and transformer oil coolers as well as transformer oil pumps and valves.

We also supply any custom engineered heat exchangers for new applications or replace obsolete legacy heat exchangers. We work with established suppliers in the Nuclear industry such as; Unifin International, HEXECO, Super Radiator Coils, and API Heat Transfer.

Dewar Industrial Services Inc.

Dewar Industrial Services Inc. is a trusted leader in general contracting and civil construction, delivering exceptional results in Canada's nuclear sector. As a private, Canadian-owned company with over six decades of expertise, we've built a legacy of precision, reliability, and forward-thinking execution.

Since 1957, we have provided comprehensive construction and maintenance solutions across power generation, institutional, commercial, and industrial sectors—completing nearly a billion dollars in nuclear project work. Our difference? A deep-rooted commitment to quality, safety, and innovation, backed by a team that doesn't just get the job done—but gets it done smarter, safer, and with unmatched efficiency.

Our strength lies in our people—seasoned professionals who bring an agile, solutions-driven mindset to every project. We think beyond the blueprint, working side-by-side with clients and partners to navigate challenges, optimize performance, and deliver a true competitive advantage.

When you work with Dewar, you're not just hiring a contractor—you're gaining a proven partner dedicated to driving success in the nuclear industry.

E.S. Fox Limited

Since 1934, E.S. Fox Limited (ESFL) has set the standard for Safety and Quality Assurance. With over 3.0 million direct hire person-hours last year, our multi-trade, experienced workers self-performed Structural, Mechanical, Electrical, Sheet Metal, Millwrighting and Refrigeration services. Our highly skilled expertise lies within the Industrial, Commercial, Institutional (ICI) and Power Generation Sectors. We have (3) state of the art fabrication shops where we maintain more than 800 weld procedures and 40 certifications under ISO, CSA, CWB and ASME programs. Our largest shop, which is located on the Welland Canal is a world class module, vessel and pipe fabricators with a proven capability in quality assurance documentation.

We have proudly served the Nuclear Industry for over 50 years and our expertise is unmatched. As nuclear power generation evolves to SMR's, ESFL is ready to support manufacturing, factory fabrication, shipping and logistic solutions, technical services, Engineering / QA, field construction, installation and commissioning.

Eclipse Automation Inc.

Eclipse Automation builds custom automation for the full nuclear lifecycle, from new build and modular construction to decommissioning and remediation. Our systems are used for complex tooling, reactor operations, inspection, waste handling, site restoration, and life extension programs. We design and deliver solutions that increase workforce safety, reduce downtime, and ensure full traceability. With vertically integrated capabilities, such as design, machining, assembly, controls, and documentation, we manage every detail in-house to meet the nuclear industry's rigorous standards.

Our team brings deep domain experience across legacy and next-gen nuclear projects. Whether supporting reactor builds, automating glovebox processes, or optimizing late-life plant management, we help utilities and contractors meet performance and compliance goals—safely and efficiently.

EXO Insights Corp.

Focus Your Training on the HOW

When training, we all know what, where, and when. So, what about the HOW?

Experienced instructors and training leaders understand that HOW matters. But uncovering the HOW demands decades of sector-specific experience, a keen eye for evaluating trainee behavior and hours of work to provide actionable and worthwhile feedback for performance improvement.

EXO's Biotwin® Human Performance Platform puts the focus on the HOW. By measuring a trainee's behavior using PPE-integrated sensors, we help training leaders bring their training and team to the next level.

With Biotwin®, you can:

- Measure procedure adherence and situational awareness with an all-in-one tool
- Gather real data at mock-up or on-premises training
- Rank performance against individual or best-in-class baselines
- Eliminate subjectivity and biases
- Reduce training managers' reporting and assessment time

Put your focus on the HOW today. Deploy Biotwin®.

Facca Incorporated

Facca is an established heavy civil contractor specializing in precast and cast in place concrete and steel construction, as well as deep foundation and marine construction. Facca also produces custom precast pre- and post-tensioned structural elements for bridges and other facilities as well as custom steel fabrications.

Facca is a producer of Ultra High Performance Concrete and has contributed significantly to the research and development of the material in structural applications. The superior strength and durability of the material over normal concrete support a number of applications in the nuclear industry, both potential and realized. Existing structural applications of UHPC in nuclear facilities in Europe have demonstrated its excellent durability in extreme environments. The materials strength and ductility yield enhanced protection against impact, blast and seismic events can be applied in retrofits and construction of containment structures. The previously mentioned properties, along with its extremely low permeability and resistance to chemical attack have been suggested as having great potential in spent fuel and waste storage.

FBT Inc.

FBT Inc. is a fourth-generation family-owned advanced manufacturing company that specializes in highly engineered tight tolerance precision machined components and parts. These parts are used in various critical sectors, Nuclear being a major part of it.

Through various expansions over the years, FBT Inc. has the ability to offer full service capabilities in the areas of design and engineering, precision and advanced manufacturing, assembly, quality control and inspection. We typically take on small to medium sized machined parts with high tolerance features as tight as $\pm 0.0001"$. In addition to precision machining, we also have full capabilities to design and build custom tooling and produce hundreds to a hundreds of thousands of stamped parts per year. Our 40,000 square foot climate controlled facility boasts 4,000 square feet of engineering and office administration space, 100+ employees and 120 machines. A great deal of thought has gone into the layout of our plant to create a common sense flow of material arriving in our shipping area which continues throughout the manufacturing process until the finished part is prepared to ship to the customer.

Forged Operations Inc.

Forged Operations is a Canadian company dedicated to improving efficiency, compliance, and safety in the nuclear sector through purpose-built digital tools. Our flagship platform, OpsAssist, enables nuclear operators and adjacent industries to digitize and streamline operational processes that have traditionally relied on paper, spreadsheets, or legacy systems.

Designed in collaboration with nuclear professionals, OpsAssist supports use cases such as facility walkdowns, inventory and tool management, confined space tracking, and procedural compliance — all with a focus on intuitive design and real-time visibility.

We understand the unique demands of high-regulation environments. Our solutions are fully customizable to existing workflows and are built to stand the test of time, with included support and ongoing enhancements. Whether it's digitizing inspections or creating a robust audit trail for regulatory readiness, we help nuclear organizations transition from manual to modern — without disrupting operations.

Forget The Name

Forget The Name is a talent consulting company that helps nuclear organizations build or improve how they hire. After 10 years recruiting in the nuclear industry, the founder set up the company to support teams in sourcing, attracting, and retaining the right people - especially for critical or hard-to-fill roles.

Forget The Name doesn't do recruitment. They train internal teams and hiring managers to do it better themselves. They work on things like improving job descriptions, building sourcing strategies, creating structured interviews, and helping hiring managers feel confident and prepared. They also support organizations in aligning recruitment with business goals.

Everything they do is simple, actionable, and tailored to each client's needs. The goal: better hires, faster, and without relying only on external help.

GE Vernova

GE Vernova's Steam Power Services business offers a broad portfolio of technologies and services—predominantly for nuclear and fossil power plants—helping customers deliver power that's reliable, affordable and sustainable as our industry transitions to a lower carbon future. As an energy transition partner, our team delivers support to operators around the globe including:

Steam Power Services has been a long-standing partner to the nuclear industry for decades. Now, our steam turbine, generator and controls technologies operate in plants across the Americas region, producing 85 GW of carbon-free power to the grid.

We service OEM and legacy GE Vernova brand nuclear turbine island assets with an Americas regional footprint of field service experts and service centers when and where you need us. From emergency parts and repairs response to outage planning/execution to life extension solutions, we continue adapting our service platform as an energy transition partner.

Graham Nuclear Ltd

Graham was founded in 1926 and became employee-owned and operated in 1984. As a Tier 1 Contractor, Graham has become an industry leader as one of Canada's Top 5 Construction Firms (by revenue), and one of Canada's Top 50 Managed private companies – Platinum Status.

Focused on delivering solutions to clients across North America, Graham operates under Industrial & Infrastructure and Buildings divisions, delivering projects of varying scope, scale, and complexity. In addition, our DSI division integrates finance and development capabilities for our business and clients.

As a full-service construction partner, Graham Industrial's self-performance capabilities allow us to offer enhanced performance options for improved budget, schedule, quality and productivity. Our self-performed services include, but are not limited to, civil, utilities, concrete, structural steel, mechanical, piping, electrical and instrumentation, and rough carpentry.

Great Lakes Industrial Controls

GREAT LAKES INDUSTRIAL CONTROLS is the exclusive ONTARIO representative for the following CURTISS WRIGHT BRANDS For ASME SECTION III and ASME SECTION VIII applications:

EST GROUP / Emergency Repair Plugs for Heat Exchangers & Condensers and Test Plugs
FARRIS / Safety & Pressure Relief Valves
PHONIX / Steam & Nuclear Valves
SOLENT & PRATT / Zero-Leakage Triple Offset Metal Seated Butterfly Valves

GREAT LAKES INDUSTRIAL CONTROLS is also the exclusive CANADIAN representative for the following CIRCOR BRANDS for ASME SECTION VIII applications:

LESLIE CONTROLS / Steam Control Valves, Regulators & Steam Water Heaters
NICHOLSON / Steam Traps
SPENCE / Steam Control Valves and Regulators
RTK / Process Control Valves

GTT Digital Corporation

GTT Digital Corp. is the Canadian staffing subsidiary of Global Technical Talent (GTT), a proud Indigenous owned and Native American–economically disadvantaged enterprise with over two decades of proven experience. As an ISNetworld Member Contractor, GTT Digital specializes in delivering comprehensive workforce and project-based solutions across IT, Engineering, Digital, Cloud, and ERP domains.

Our services include:

Time & Materials (T&M) Statement of Work (SOW)

Outcome-Based SOW

Milestone-Based SOW

Fixed-Price SOW

Managed Services / Business Process Outsourcing (BPO)

Contract Staffing, Contract-to-Hire, Direct Placement

Payroll Processing Solutions

GTT Digital supports mission-critical initiatives in software development, technical and systems engineering, automation, construction, transmission, cloud migration, project management, and ERP/CRM implementations.

Hamilton X Packaging & Pallets Co Ltd.

Established in 1994 a family operated export crating/pallet company located in Hamilton Ontario, servicing advanced manufacturing companies in the GTA. We are well versed in specialized skidding/crating and packaging of any shape/size/weight components both on site and off site. We have the ability to handle 30ton at our 38,000 sq ft facility with multiple overhead cranes. Our team designs and builds custom packaging that is customer and equipment specific ensuring your products are handled and packaged for safe transport to its destination. We offer containerization for global shipments. We use the best preservation/protective packaging practices keeping your products in pristine condition throughout the export crating process. In addition, Hamilton X Packaging offers storage/warehousing in Hamilton at affordable rates.

Contact us for all your crating/skidding needs.

Heritage Safety Products

Heritage Safety Products has been supplying PPE and safety solutions to the Nuclear Industry since 1980. Heritage assists end users with various outages, refurbishments, cost savings and green initiatives and on-going projects. With our strong knowledge and experience, combined with our contacts within the Nuclear Industry we can resolve and offer many solutions. The Nuclear Industry is always changing and adapting, and Heritage Safety has always been able to change and adapt with it. Heritage offers exceptional customer service with the ability to respond quickly to all unexpected occurrences during regular business hours, and after hours. Heritage Safety is a key supplier to Ontario Power Generation and is a diverse supplier with our certification with WBE (Women Business Enterprise)

Hilti (Canada) Corporation

The Hilti Group is a family-owned company founded in 1941 in Lichtenstein by Martin Hilti. The group today counts more than 29,000 employees across 120 countries and developed partnerships with more than a million customers overall. Amongst other business areas, Hilti supplies products and services specifically tailored to the nuclear industry. We are a reliable partner with all major nuclear technology providers across the world. Our solutions are present in many nuclear technologies. To date, we have been involved in more than 57 construction sites around the world. Hilti is also engaged in every step following the construction whether it is maintenance, repair and operation, refurbishment or decommissioning. We have a resolute commitment to meet the high expectations of our customers by constantly providing solutions and services satisfying completely all regulatory requirements, owner's requirements, and designers specifications. Through an international experience that upholds a permanent innovation process, we assure our customers that they always work with products on the very latest technological standard.

I Heart My Work

I Heart My Work Inc. is a boutique Canadian leadership and team coaching firm supporting organizations across critical infrastructure sectors, including nuclear. At our core, we are capacity builders, we work with organizations and industry partners to strengthen leadership, team effectiveness, and people systems in complex, highly regulated environments. Our work focuses on helping leaders and teams do the work better together. This includes facilitated team development, 1:1 leadership coaching, and practical capacity-building initiatives that improve collaboration, decision-making, accountability, and execution during periods of growth, transition, or increased operational pressure. We are often engaged where organizations are navigating change, building new capability, or aligning diverse stakeholders around I Heart My Work also supports the advancement of women and underrepresented leaders in technical and infrastructure sectors and serves as a facilitator within industry-aligned leadership programs. This work complements our broader focus on building inclusive, sustainable leadership capacity. Our approach is practical, people-centered, and grounded in real operational contexts, helping organizations build resilient teams and leadership capacity in support of a future-ready nuclear workforce. plant operators worldwide.

IMI Critical Engineering

IMI Critical Engineering has over 60 years of proven, reliable nuclear power plant service and over half of the world's nuclear power plants relying on our critical valve technology. With over 250,000 of our products installed either in nuclear power plants or on vessels or submarines, we have the knowledge and experience to deliver the highest quality, reliability and safety in the industry.

IMI Critical Engineering delivers best in - class products through IMI CCI, IMI STI, IMI Bopp & Reuther/NH (Newman Hattersley) and IMI Truflo Marine.

Through IMI CCI, we supply severe service control valves featuring DRAG® technology and system medium actuated technology for isolation valves and pilot operated safety valves. Combining a range of actuation options, including our STI QuickTrak®, we provide the highest performing and reliable valves in the industry. IMI Bopp & Reuther/NH has proven technology for long life pressure relief and safety valves. The Newman Hattersley bellows sealed globe valves, piston check valves and ball valves provide sustainable, cost-effective performance for all CANDU nuclear power plant operators worldwide.

IR Supplies and Services

IR Supplies and Services is the trusted source for NDT equipment in Canada. Not only do we supply the top NDT products and brands, we also perform non-destructive testing research, provide NDT training courses, and perform maintenance, repair and equipment calibrations. We cover several disciplines including radiography, ultrasonic, magnetic particle and liquid penetrant. IR leverages both outside partners and internal capabilities to bring the most comprehensive and high-quality NDT equipment to our clients. Our own research and development department manufactures our in-house line: Exposure Products. From exposure devices to collimators to the latest technology in personal dosimeters, along with fluorescent magnetic particle and film viewers, we have it all. Our mission at IR is to place the needs of the client above all else by providing exceptional NDT products and services from industry leaders and innovators, and supporting those products and services in every possible way. With our team of highly skilled staff and industry experts we are able to deliver on this mission with pride.

Kubes Steel Inc.

Kubes Steel Inc. is a Canadian-based metal fabrication company with over 50 years of experience supporting highly regulated industrial sectors, including nuclear, rail, energy, and heavy manufacturing. Our nuclear-related business is focused on the fabrication of safety-critical steel components, assemblies, and structures that demand strict adherence to quality, traceability, and documentation requirements.

Operating from Southern Ontario, Kubes Steel maintains a strong quality culture built around certified processes, disciplined shop controls, and experienced tradespeople accustomed to working under customer-specific quality programs. We are N299 certified and routinely execute work requiring full material traceability, controlled welding procedures, qualified personnel, and comprehensive inspection and documentation packages.

Kubes Steel has experience supporting long-life infrastructure programs where reliability, repeatability, and conservative execution are essential. Our proximity to major Canadian steel suppliers, access to a skilled labour force allow us to reliably support nuclear projects across Canada.

L3Harris MAPPS

For more than 50 years, L3Harris has worked with leading utilities, plant designers and research organizations to create superior training simulators, early learning technologies and engineering simulators; and has established itself as the world's pre-eminent manufacturer of power plant simulators for CANDU, PWR, BWR, gas-cooled reactors – and SMRs too. L3Harris has vast experience in supporting New Build projects with its Orchid® simulation solutions—resulting in significant error reduction in the plant designs.

L3Harris also offers technology-enabled nuclear training services and full-scale, interactive 3D digital twins to support nuclear power OEMs and operators. Visualizing and manipulating the 3D digital twins can be enhanced with our disruptive display technology—Orchid® IX—providing 3D immersion without VR headsets.

In addition, L3Harris provides CANDU plants' digital control computers and offers other CANDU plant I&C replacements.

Leesta Industries Ltd.

Leesta is in the early but proactive stages of entering the Canadian nuclear industry. This diversification aims to replace revenue lost due to U.S. trade tariffs and leverage existing aerospace manufacturing capabilities.

Capability Alignment

Expertise in high-precision machining, complex welded assemblies, and high-performance materials (Inconel, titanium, stainless steel).

Operations are already AS9100D and ISO 9001 certified, with potential for expansion into nuclear-specific certifications.

Focus area:

- Strong emphasis on Small Modular Reactors (SMRs), identified as a major growth area in Canada.
- Exploring involvement in fusion technology and components for traditional nuclear reactors

Lokring Eastern Canada

Lokring supplies the only cold weld for small bore pipe and tube. Lokring's mechanical fittings use the elastic properties of its material to create a metal to metal seal that provides the same permanence and integrity as an ASME coded butt weld. All of Lokring's fittings are ASME code qualified and CRN certified. Lokring is used as a direct replacement for welding, providing the same permanent connection, but with a completely cold work permit process. Whether it's repair and maintenance or projects, Lokring can provide you with a safer working environment, considerable construction time savings, a lower re-work rate in the field and at a fraction of the cost of traditional welding and fabrication methods. Lokring has various materials including; stainless steel (316/316L), Carbon Steel and brass for copper tube.

Makhos Inc.

Makhos has been in business since 2016. We are a certified CCAB Indigenous owned company, with a focus on training, development and creating employment opportunities for marginalized groups & communities. We do PAR certified Cultural Awareness Training for companies, as well as consultation. We work with progressive unions to be able to familiarize new workers in the trade industry in various roles. LiUNA and the CUSW have both opened up their training programs to us to be able to facilitate in our shop/space. We have also partnered with significant businesses who have the same vision as us, and together, we plan to make a real difference.

Makwa-Cahill LP

Makwa Development Corporation and The Cahill Group have partnered in 2020 to establish Makwa-Cahill LP, a fully qualified indigenous fabrication, construction, and maintenance company, focusing on industrial, nuclear, and other strategic project opportunities within the energy sector. Makwa-Cahill is committed to engaging with clients across Ontario to foster meaningful opportunities for the development and employment of qualified trades and professional resources, thereby contributing to the stimulation of the local and provincial economy. Together, Makwa-Cahill aims to deliver our nuclear and energy clients and partners with solutions that are socially responsible, locally sourced, qualified, cost-effective, and technically advanced, all produced in Ontario.

Makwa-Dewar Limited Partnership

Makwa-Dewar Limited Partnership is an Indigenous-led collaboration between Makwa Development Corporation and Dewar Industrial Services Inc., combining deep community roots with industry-leading expertise to deliver outstanding construction and industrial solutions. This partnership brings together Makwa Development's Indigenous values, local knowledge, and commitment to sustainable growth with Dewar's six decades of proven excellence in construction and industrial services. Together, we offer a unique, high-performance approach that prioritizes safety, quality, and meaningful community impact.

At Makwa-Dewar, we go beyond delivering exceptional results—we build genuine partnerships that create economic opportunities for Indigenous communities, foster local workforce development, and set a new standard for collaboration in the nuclear industry. By bridging Indigenous and non-Indigenous business expertise, Makwa-Dewar is positioned to drive innovation, economic empowerment, and long-term success for our clients and communities alike.

March Consulting Limited Partnership

March Consulting Associates Inc. is an outcome-driven multi-discipline engineering firm, offering a full suite of engineering, project and construction management, and procurement services for heavy industrial clients. Established in Saskatchewan in 1999, March is a majority employee-owned company, with 25 percent ownership held by Kitsaki Management Limited Partnership, the business development corporation for the Lac La Ronge Indian Band in Saskatchewan. March has offices in Saskatoon, Regina, and Calgary. We advance sustainable clean energy solutions through our holistic systems-thinking approach. By seamlessly integrating multi-discipline engineering and consulting services, we consistently deliver the outcomes you require to meet your clean energy goals. Our team of experts have decades of combined experience in mining and heavy industrial projects. We leverage these strengths to develop solutions for clean energy projects, including nuclear, biomass, renewable energy, and energy efficiency.

Marmen Inc.

Leading OEMs are relying on our expertise and trusting us with their large-scale nuclear projects. Our expertise in machining, fabrication and mechanical assembly combined with our team's forward-thinking vision and innovative approach, make us the ideal partner to realize large and long-term complex projects. Customers get direct access to in-depth manufacturing knowledge that we have developed from delivering turnkey solutions to key players in various industries. Marmen can manufacture or refurbish a wide range of components for the nuclear energy market including: - Parts required in the refurbishment of nuclear power plants. - Machining or fabrication of large custom-built nuclear components. - Nuclear tooling. - Nuclear power retirement equipment parts. - Nuclear waste canister or dry cask storage. - Complex assembly. Type of parts: Canister, lower shroud, lower head, stator frame, weldment, shielded storage container, frame, shell flange, tube sheet, rotor flange, stator cage, LP blade carrier, diaphragm, packing casing, and much more.

Marsh Instrumentation Ltd.

For over 39 years, Marsh Instrumentation's Canadian Nuclear Services division has been delivering Engineering, Design, Testing, and Laboratory/Calibration Services to nuclear power plants both in Canada and globally.

We specialize in Nuclear Product Design and offer expertise in:

- Instrumentation Manufacturing,
- Custom Design,
- Engineering,
- Assembly & System Integration, and
- Supply of Components
- Testing.

Our range of services includes:

- Commercial Grade Dedication (CGD)
- Item Equivalency Evaluations (IEEs)
- Reverse Engineering
- Laboratory Services
- Qualification Testing

Commercial Grade Dedication (CGD)

Our CGD services help nuclear power plants ensure the reliability and quality of commercial-grade (CG) items before they are used in operations. Our process follows a detailed CGD plan and methodology.

Marshield Radiation Protection Products

Since 1979, MarShield has been a leader in the custom manufacture and distribution of lead, heavy tungsten alloy, and non-lead alternative radiation shielding products & materials to the nuclear energy industry.

Proven nuclear pouring procedures, along with our N299.3-16 & ISO9001:2015 quality programs, are in place to ensure the effectiveness of all lead pours & castings. Full turnkey solutions are available with full fabrication, machining, coating, industrial sewing and other capabilities. MarShield can take assist with your shielding challenges offering a high degree of customization.

MarShield carries a large inventory of shielding products including lead bricks, lead sheet & plate, lead shot, nonlead alternative blankets & wraps, lead wool blankets, pure & borated polyethylene, high density concrete blocks. Custom manufactured heavy tungsten alloy, leaded glass, lead-lined cabinets & storage, and leadlined barriers are also our specialty.

McCann Equipment Ltd.

McCann Equipment Ltd. is a multi-branch Canadian industrial tool distributor, specializing in the sale, service and rental of torque and tensioning products. Our services include the repair, calibration and certification of torque tools (manual, electric, pneumatic, hydraulic), transducers and testers. Additionally, we certify air pressure gauges and hydraulic gauges as well as tension calibration testers. The following facilities hold an ISO/IEC 17025 Accreditation: Dorval, Edmonton, Oakville, Winnipeg, and Quebec City. Our Certificate of Accreditation and Scope for each branch operation is available on our website: www.torquetools.com.

MFE Inspection Solutions

MFE Inspection Solutions is a leading NDT, RVI, Environmental, and UAV solutions provider. MFE Specialists partner with their customers to provide comprehensive support from making the initial appropriate equipment choices to implementation and assessment. MFE offers a large inventory of equipment from top manufacturers including Flyability, Voliro, Skydio and Boston Dynamics ensuring their customers have access to the most advanced, innovative technology available.

MFE's offerings expand beyond sales and rentals to include equipment calibrations, repairs, and training.

MFE offers Advanced UAV Piloting courses, Infrared Thermography Courses, MFL Inspection, and specialized advanced Elios indoor drone inspection training.

From its inception in 2009 in Houston, MFE Inspection Solutions have grown to 14 locations across the United States, Canada, Mexico, Egypt, and United Arab Emirates.

Mirion Technologies

At Mirion Technologies, we partner with critical nuclear facilities to support and empower nuclear operators throughout the entire plant lifecycle. Our Canadian manufacturing facilities based in Cambridge, Ontario (IST Canada) and Concord, Ontario (Canberra) offer Nuclear Flux, Temperature (TCs, RTDs), Liquid Level Sensing Systems (sensors, cabling, signal processors and parameter displays), Reactor Containment Electrical Penetrations, Radiation Tolerant Camera Systems, and a range of Contamination and Clearance Monitors to manage radiation safety challenges and maintain continuous operations. Manufactured under our mature audited and accredited Nuclear QA Programs, our solutions for nuclear power (many deployed in Safety Systems applications) are integral to nuclear plant safety and operations. We are proud to be long-standing partners (over 60 years) in the nuclear industry, trusted to provide mission-critical products and services that conform to the most stringent regulations, and maintain precise and predictable performance throughout their life cycle. At Mirion, we are Protecting What's Next and Advancing Radiation Safety while Harnessing Our Unrivalled Knowledge of Ionizing Radiation for the Greater Good of Humanity.

POWER FOR ONTARIO. A PUSH FORWARD FOR THE WORLD.

With the world's future energy demand rising, its demand for leadership rises with it. OPG is proud to step forward to build the first SMR in the G7, taking our nuclear expertise to the global stage. From here, we have the power to shape a cleaner, more reliable energy future for everyone.

New Era Group

The New Era Group is a private Corporation located in Toronto. Founded in 1963 we have evolved from a custom job shop specializing in large machining and fabrication, to a multi-faceted company that can work with a diverse customer base to achieve their manufacturing goals.

We provide end to end solutions for our worldwide customers who value respectful service and our expertise to solve their challenging technical and time-constrained applications. We continue to increase our scope of capabilities, investing in equipment and committed employees to serve our core markets and customers.

With additional services including: welding and fabrication, hydrostatic testing, and assembly New Era's focus on product quality extends beyond ISO 9001 to include our successful transition to N299 standards.

Niagara Fasteners Inc.

Niagara Fasteners Inc. is a manufacturer and distributor of high quality bolts, nuts, studs, anchor bolts and specialty machined components. We can thread from 6/32" - 6" in diameter and can custom upset our own bolts 1/2" - 2 1/2" in diameter. With CNC lathes and mills we have the ability to manufacture precision fasteners and machine components. Our fully equipped machine shop also has presses, benders, saws, drills, and mills, welders and conventional lathes with over 50 machines and 42 years of experience. With our in house capabilities we are able to offer a complete line of fasteners, nuclear bolting and nuclear raw materials on time and at a competitive price. Through the use of approved vendors, Niagara Fasteners Inc. has the ability to perform chemical analysis, mechanical testing including Charpy impacts and non-destructive examination. (MPI, LPI, UT) Niagara Fasteners Inc. has the ability to supply ferrous and nonferrous fasteners/material to the following subsections of the ASME Boiler and Pressure Vessel Code. All editions are from 1974 thru the current edition and addenda.

NiagaraSteel Service Center

NiagaraSteel Service Centre is a trusted supplier to Canada's nuclear industry, delivering high quality materials and services that meet the most stringent standards for safety and reliability. Our nuclear division specializes in sourcing and supplying carbon steel, stainless steel, aluminium and specialty alloys with full traceability to mill and country of origin. All materials are procured exclusively from ISO 9001:2015 certified mills and comply with CSA CANPAC N299.4 requirements, ensuring adherence to nuclear grade specifications.

We provide comprehensive documentation, including mill test reports, to guarantee quality assurance and regulatory compliance.

Our team understands the critical nature of nuclear projects, offering precision machining, stress relieving and fabrication services tailored to the sector's unique demands. By leveraging global procurement capabilities, NiagaraSteel ensures timely delivery of certified materials for reactor components, piping systems, and structural application. Our commitment to excellence and safety makes us a reliable partner for nuclear operations and contractors across Canada.

Novevia Consulting

Novevia Consulting provides quality management system architecture and supply chain compliance services to manufacturers and laboratories operating in Canada's most demanding regulated industries - aerospace and defence, nuclear supply chain, and accredited laboratory environments. Founded on over a decade of hands-on quality leadership inside manufacturing - including quality and supplier development roles at NovaBus, Volvo Group Cooperation - Novevia brings practical implementation experience that consulting firms built outside industry cannot replicate. This includes demonstrated experience building integrated quality management systems that simultaneously satisfy multiple accreditation frameworks under real operational conditions. In the nuclear supply chain specifically, Novevia supports manufacturers pursuing qualification under NQA-1, and ASME BPVC Section III, CSA N299,- helping companies understand the gap between their existing quality program and nuclear qualification requirements, and building the systems needed to close it efficiently.

Nuvia Canada

Nuvia Canada is a specialist nuclear services organization working across the complete nuclear facility lifecycle. We assist our Canadian customers to safely, economically, and successfully plan and undertake nuclear material handling, waste management, facility decommissioning and site remediation projects.

Our services include strategic and technical consultancy, design and development of solutions, and radiation protection services. Radiological safety is at the core of what we do – we are the leading supplier of radiation protection surveyors and decontamination specialists to the Canadian nuclear industry.

Nuvia's product catalogue offers an extensive range of cost-effective, off-the-shelf products, materials and design solutions to tackle a variety of requirements within a radiological environment. These include plant life extension, component and facility design, fire/flood/seismic protection, ventilation and containment systems, and radiological monitoring instruments.

Nu-Tech Precision Metals Inc.

Since 1957 Nu-Tech has manufactured every pressure tube in operation in every CANDU reactor world-wide. Other CANDU related offerings include seamless zirconium and hafnium tubes for research reactors (NRU, MAPLE, HANARO, Bettis, FRM), Electron Beam welded tubular assemblies, zirconium flow tubes (circular and hexagonal), FARE tubes, stainless liner tubes (CANDU, feeder tubes and elbows - small lot, original code year) in carbon and low alloy steels. Products for PWRs, BWRs and naval reactors: zirconium, titanium, copper, nickel-based alloys and stainless tubes for feed water pipe and fittings, control rod drives, feedwater desalination and flux detector housings. Innovation continues with development of products used in the core of new Small Modular Reactors and the construction of zirconium pressure vessels for testing new forms of nuclear fuel. NPT Stamp and TSSA Registration as a Material Organization.

Power Generation Integrated

Power Generation Integrated (PGI) is a leader in clean energy integration, leveraging over 34 years of expertise in nuclear and advanced reactor technologies. Specializing in Small Modular Reactors (SMRs) and CANDU reactor lifecycle management, PGI delivers innovative solutions to meet evolving energy demands.

Beyond traditional nuclear applications, PGI provides consulting services across industries such as data centers, oil and gas, mining, and manufacturing. By integrating nuclear systems for low-carbon energy and process heat, PGI enhances efficiency and reduces emissions, supporting global sustainability goals.

PGI's expertise spans hydrogen integration, renewable energy systems, digital engineering, and additive manufacturing, ensuring future-ready solutions. With a global track record across North America, Europe, and Asia, PGI is a trusted partner in delivering sustainable, integrated energy solutions for a cleaner future.

ProAffirm Inc.

Incomplete QA documentation packages and audit findings delay revenues and erode competitiveness. ProAffirm removes the documentation compliance bottlenecks that often stall revenues and disrupt schedules. By managing the rigorous documentation requirements of Canada's nuclear power plants, they allow your engineering and operations teams to stay focused on what they do best: delivering critical technical work.

Their expertise spans the full nuclear lifecycle, including:

- Quality Assurance (QA): Documentation and audit readiness.
- Procurement as a Service (PaaS): Strategic sourcing and vendor qualification.
- Commercial Grade Dedication (CGD): Ensuring non-nuclear items meet nuclear standards.
- Proposal Development: Strategic support for RFPs, RFQs, and tenders.

Prolucid Technologies Inc.

We are a software engineering services firm based in Mississauga Ontario. Since 2008 we have been developing software for inspection, NDT, automation, and analytics applications for customers in the Canadian nuclear industry. Our services include embedded and real time systems, HMI and data visualizations, computer vision, machine learning, and cloud/mobile applications. Our software applications have been successfully commissioned and are operating reliably in multiple Canadian nuclear plants. Deployed projects include fuel channel inspections, machine vision tooling for MCR, software-assisted data analysis, systems integration, and legacy tooling support. Our software development project approach is designed to minimize risk and is flexible enough to meet the exact requirements of each project. At our core we are problem solvers and over the past 14 years we have worked with our industry partners to deliver highly successful software solutions. We are excited to continue developing software solutions that contribute to a more sustainable future.

PROMATION

PROMATION Ltd.

PROMATION is a leading designer and manufacturer of high-quality reactor systems and tooling, automated equipment for radiopharmaceutical production, processing and packaging. We develop safe and innovative solutions that are highly reliable for operation in constrained and harsh environments. PROMATION offers nimble and effective Project Management, Engineering, QA (N299.1, N285, NQA-1, ISO9001), and Manufacturing expertise to support our extensive service offerings:

- Reactor Systems
- Custom Reactor Tooling and Robotics
- Design, Registration, Fabrication, and Certification of Nuclear and Non-Nuclear Pressure Boundary Components
- Integrated Process Systems
- Advanced and Modular Reactor SSC and Factory Automation
- Automated Medical Isotope and Radiopharmaceutical Equipment
- Hot Cells and Shielded Isolators
- Waste Decommissioning and Handling Equipment
- Mock-ups and Testing Coupons
- Rapid Prototyping and Development

At PROMATION we embody our commitment to embracing ethnic, gender, and cultural diversity within our inclusive and socially responsible business practices.

A CAPITAL PROJECT
SERVICES PARTNER

PTAG

PTAG is a global capital project management services company providing the Power & Utilities, Mining & Metals, and Oil & Gas industries and Infrastructure. PTAG employs an integrated approach with owners that delivers successful planning and execution of their capital programs. PTAG has been providing these services since 2008 in Canada and United States, and has most recently increased presence in Australia. PTAG has over 200 capital project professionals. We support our clients from strategy development through to project execution and closeout.

PTAG partners with industry and our clients to develop project improvement opportunity's and innovation of Best Practices for Heavy Industry Capital Projects. PTAG is recognized by the Construction Industry Institute as a Registered Advisory Partner (RAP) and Registered Education Provider (REP). In addition to CII, PTAG's Project Management practices adopt leading standards as set by Project Management Institute (PMI) and other industry associations such as CMAA and AACE.

Our team of professionals deliver project and construction management services with years of capital project experience to support our client's deliverables.

Quantum CNC Inc.

Welcome to Quantum CNC, a CNC job shop specializing in the precision machining of customized products made from a variety of materials. Quantum serves leading industries in the GTA, across Canada and around the world.

A manufacturing-based company that uses only the highest quality materials, specializing in turning, milling (including 5-axis capabilities) and EDM processes and efficiently handling jobs with multiple stages. Quantum works to tight tolerances to ensure the best fit. With on-time delivery, Quantum's expert engineers and machinists translate customer-driven design into impeccably finished components to power your business. We're not afraid of a challenge. In fact, we thrive on it. From our extensive experience with exotic materials and the high-end machining equipment we use, to the calibre of our team, our unique capabilities surpass our customers' expectations.

Quantum Events Inc.

We are a specialized events management company with a strong focus on Professional Conference Organizing (PCO) services,

Audio Visual, IT, Graphic Design and Marketing services particularly within the nuclear industry.

Our expertise lies in planning and executing high-profile nuclear conferences such as the Annual Conference (Anncon), G4SR, MCFD, SMiRT, and DIET, all organized under the umbrella of the Canadian Nuclear Society (CNS). We offer comprehensive support from the initial planning stages to the successful execution of each event.

Our services include venue research, contract negotiation, program planning, speaker coordination, delegate registration, on-site logistics, and post-event reporting. In addition to conference management, we also provide end-to-end Audio-Visual (AV) solutions tailored to the unique needs of each event. This includes supplying and managing projectors, microphones, sound systems, and technical staff to ensure seamless presentations and live sessions.

RadSafe Canada Ltd.

RadSafe is a Canadian company established in 2001 in Pembroke, Ontario that specializes in radiation protection assessments, training, and support for both short-term and long-term projects. Our employees have extensive experience working in the nuclear field, including assignments at nuclear research and power generating facilities, nuclear waste remediation sites, hospitals, and universities. The company is well respected within the nuclear industry for providing exceptional services and has attracted experienced radiation protection workers from around the world. RadSafe can provide a full scope of radiological services ranging from the development of a Radiation Protection program, management of RP services within a construction island project, and provision of supplemental resources to complement current project demands. The RP resources available include health physicists, and radiation protection surveyors/technicians. The radiation team are full-time radiation protection surveyors with the knowledge, training, and experience necessary to address the responsibilities relevant to their duties. Our seasoned surveyors can take on supervisory or leadership roles. Their stellar work history speaks to their commitment to ensure safe work environments and their ability to exercise sound judgement.

Raise Limited

We take recruiting to new heights!

Raise (formerly Ian Martin) is a leading staffing solutions provider that's been connecting people in meaningful work for more than 65 years.

Founded in 1957, we have a long history of Engineering, IT, and technical recruitment, contract management, and payroll services. We have grown into a family of companies that provides diverse and specialized hiring support across a broad range of industries in North America, including nuclear, power & energy, mining, financial services, government, life sciences, and food & beverage. With almost 9,000 placements in 2023 and a contractor success rating of 98.8%, we're raising expectations for recruitment across North America. In addition to our traditional business in technical fields and our direct sourcing offering, we offer light industrial and specialized IT skills assessments to support our clients.

When you partner with Raise, you'll get more than a great hire —you'll join a vast network of recruiters, employers and workers that are trying to make a better world through work.

REEL COH Inc.

Experts in Custom Complex Handling and Lifting Systems

REEL COH Inc. offers turnkey solutions across North America.

Our product lines include production overhead cranes, electromechanical lifting equipment, automated handling systems, gantry cranes, telescopic aircraft maintenance platforms, transfer cars, and specialized handling equipment involving lifting or horizontal cargo movement through hooks or sophisticated gripping mechanisms.

REEL COH is also a key player in the market for modernizing customized production cranes already in use.

We bring over 55 years of expertise in integrated design and construction of handling systems.

Ritepro LTD.

Ritepro began manufacturing check valves in 1965 in Montreal, QC, supporting various industries, including nuclear power. In 2011, we established Ritepro Nuclear Inc., dedicated to the global nuclear power market. Our product range includes, but is not limited to, butterfly, ball, and check valves, with sizes from 1" to 48" and ANSI pressure classes from 125 to 2,500 lb. Our engineered solutions now account for over 35% of our sales.

Bray International, our parent company, started in 1986 in Houston, TX, and has a reputation for excellence with offices and facilities in 40 countries. As a subsidiary, Ritepro benefits from Bray's network and access to all Bray products, enhancing our ability to provide high-quality solutions.

Ritepro's QA Management System includes:

- CSA N285.0 & B51
- CSA N299.2 & N299.3
- ISO 9001:2015

R J N C

RJ Nuclear Consulting Inc.

RJNC has been in business since August 2022. We provide specialized consulting and staff augmentation services to the nuclear industry.

Our consulting practice focuses on process review, process automation and digitization, as well as technical training program development.

We recently developed a feeder replacement training program to train new QC supporting the feeder replacement program at Bruce Power.

Through our staff augmentation services, we supply skilled professionals in field engineering, project controls, and project management.

Our staff have supported major projects at Bruce Power, OPG Darlington NGS, OPG Pickering NGS, and Pt. LePreau NGS. We have

experience in supporting the design, pre-deployment, execution and closeout stages of the project lifecycle.

As a small yet agile, Kitchener-based company, we're committed to "nuclear excellence without compromise" and seek to expand our network of partnerships across the Canadian nuclear supply chain.

**RN Tooling Corporation**

RN Tooling Corp was established in 1988 to supply the nuclear industry. Since then, we have grown to become a reliable leader in the international nuclear supply chain through our uncompromising commitment to customer care, quality, and precision.

Our staff has extensive experience working with close tolerances, mock-ups, custom machinery, prototypes and exotic complex components/assemblies.

We deliver high precision components, such as maintenance tooling, fuel handling and fueling machine components and assemblies that exceed customer quality standards and expectations.

At our core, our commitment to high standards flows through all aspects of our business. We value our employees, clients and community to ensure a strict adherence to the highest level of quality, and safety standards.

Seals Unlimited an Applied Company

With over 50 years of experience in nearly every market in Canada, Seals Unlimited is recognized as an industry leader by clients seeking best available technologies for their fluid sealing applications. In the nuclear power generation market, our extensive knowledge of these applications along with the required background in materials engineering, hardware design and quality governance, allows us to deliver specialized product and technical support. This support ranges from addressing shortfalls in legacy designs, reverse engineering obsolete spares, and harmonizing material specifications to manage both cost as well as commercial access. Naturally this type of knowledge includes the essential understanding of the emerging gasket and seal challenges found in new reactor design, procurement & construction requirements.

As an accredited CSA N299.2 manufacturer, Seals Unlimited delivers even greater value as a member of the APPLIED® group of companies. APPLIED Industrial Technologies® successfully provides access to key process improvement technologies that clients are seeking with a broad range of power transmission, material handling, fluid power, filtration, flow control, lubrication and condition monitoring components & systems.

Shawflex

For over 40 years, Shawflex has been a trusted leader in the global nuclear industry, providing nuclear-qualified cable and assembly solutions to meet the demanding requirements of nuclear power plants. Our portfolio includes EQ and non-EQ cables, composite cables, custom cables for robotics and automation, as well as cable assemblies, harnesses, and cable accessories. Shawflex products have been installed in nuclear islands, turbine halls and balance of plant applications, both inside and outside the containment building. With the acquisition of Kanata Electronic Services, Shawflex expanded its ability to deliver custom cable assemblies and terminations, serving as a one-stop shop for engineered interconnect solutions. Together, we support refurbishments, decommissioning of legacy plants, new builds, and next-generation SMR technology. Shawflex products are manufactured under stringent CSA N299.2 and NQA-1 certified quality management systems.

Siemens Energy

Siemens Energy is a global leader in energy technology with more than 60 years of experience in the nuclear sector, supporting safe, efficient and reliable power generation. The company supplies advanced steam turbines, generators, control systems, and long-term service programs for both large-scale nuclear plants and emerging Small Modular Reactors (SMRs). Its technologies power about 23% of the world's nuclear plants, reinforcing Siemens Energy's role as a trusted partner in the industry. In Canada, Siemens Energy collaborates closely with utilities providing high-pressure steam turbine upgrades that increase output, enhance plant efficiency, and extend reactor life by up to 30 years. Through innovation, modernization solutions, and lifecycle support, Siemens Energy contributes significantly to clean energy reliability and the global energy transition.

Stevcon Packaging & Logistics Ltd.

Since our establishment in 1997, STEVCON and its affiliates have been pioneers in delivering cutting-edge packaging solutions to the nuclear industry. Our services encompass an array of wood and steel solutions including non-combustible packaging.

In line with our commitment to achieving net-zero carbon emissions by 2030, we proudly introduce reusable packaging options crafted from wood, steel, or plastic, including Steel reels and Bins.

STEVCON is a key packaging supplier to the thriving Medical Isotope market, developing an entirely Canadian-made packaging solution for Type A containers, complete with rigorous testing.

Moreover, our CSA n299.4 certified warehouse not only ensures security but also serves as a strategic consolidation point for seamless management of overseas projects.

We are also a distributor of nuclear approved Cortec preservation material for medium and long term storage.

As a proud member of the Canadian Council of Aboriginal Business (CCAB), STEVCON champions and wholeheartedly supports various Indigenous initiatives.

Strategic Nuclear Solutions International (SNSI)

Founded in 2021 in British Columbia, Canada, SNSI offers specialised strategic business advisory services in the Nuclear Sector, with activities across Canada, the EU, the UK, Namibia, and the UAE. Our team of highly experienced consultants focuses on initiating projects and sustaining growth in new markets.

SNSI's expertise enables us to guide clients through complex business environments, providing comprehensive support in areas such as new nuclear facility construction, life extension projects, and regulatory compliance. Whether you are starting a new project or navigating regulatory challenges, SNSI is dedicated to helping clients achieve their goals.

We are committed to advancing business, innovation, and strategic initiatives while supporting the Energy Sector in achieving net-zero greenhouse gas emissions. Additionally, SNSI is dedicated to contributing to First Nations reconciliation efforts, recognizing their crucial role in sustainable energy practices and environmental stewardship.

T

Terrestrial Energy Inc.

Terrestrial Energy is a vendor of advanced reactor power plants that use its proprietary Integral Molten Salt Reactor (IMSR) technology. This technology represents true innovation in cost reduction, safety and functionality. IMSR power plants will provide clean, convenient, dispatchable and cost-competitive heat for many industrial applications, including electric power provision and heat for industrial processes, such as chemical synthesis and desalination. They extend the application of nuclear energy far beyond electric power markets. IMSR power plants promise to transform industrial competitiveness, energy security, and drive economic growth. Their deployment can realize rapid global decarbonization of the primary energy system by displacing fossil fuel combustion across a broad spectrum. Using an innovative design, and proven and demonstrated Molten Salt Reactor technology, IMSR power plants can be brought to market in the 2020s.

The Machining Group

Comprising of five distinguished companies – Thurston Machine Co Ltd., Central Machine & Marine Inc., GFW Technologies Inc, Insitu Machining Inc., and TJ Machine & Tool, Ltd. – we seamlessly cater to diverse client requirements with our collective of machining and fabrication shops. With extensive capabilities, cohesive quality assurance programs, and large production capacity, we ensure top-notch results. Our commitment to quality is backed by stringent adherence to industry-leading standards. With expertise spanning Automation, Defence, Marine, Mining, Nuclear (N299.3 compliant), OEM, PetroChemical, Power Generation, Steel Mill Manufacturing, and Wastewater industries, we are well-equipped to tackle a diverse range of challenges with precision and excellence. Proudly based in North America, The Machining Group is 100% woman-owned.

Thermon Canada Inc.

Thermon Heating Systems (formerly CCI Thermal) is the leader in industrial heating and filtration solutions, manufacturing five of the top brands in industrial heating in addition to a comprehensive line of engineered industrial filtration products including Cata-Dyne™ Catalytic Heaters, Ruffneck™ Unit Heaters, Caloritech™ Engineered Electric Heat, Norseman™ Explosion-Proof Heaters, Fastrax® Track and Switch Heaters and 3L Filters™ Engineered Filtration Systems.

3L Filters™ and Caloritech™ have exceeded the most demanding nuclear heating and filtration requirements for over 40 years. We design and manufacture products for nuclear applications in PWR, BWR and PHWR nuclear reactors.

3L Filters™ - standard and custom products, including: cartridge filters, strainers, demineralizers, recombiners, separators, pressure vessels, and engineered systems.

Caloritech™ - standard and custom products, including: pressurizer, immersion, circulation, space, and unit heaters.

Thorburn Flex Inc.

Thorburn has over 45 years of experience in designing and manufacturing custom flexible piping and engineered connectors for specific applications found in a PHWR/PWR/BWR nuclear reactors.

Thorburn's CANDU/ PHWR experience is global: Atomic Energy of Canada Ltd., GE-Hitachi Nuclear Energy Canada Inc., HQ Gentilly (1 unit), NBP Point Lepreau (1 unit), OPG Darlington (4 units), OPG Pickering (8 units), OPG/BP Bruce (8 units), Cernavoda Romania (2 units), Wolsong South Korea (4 units), Quinshan China (2 units) and Embalse Argentina (1 unit).

Thorburn has the following certifications to support the nuclear industry in terms of design and fabrication. We are N285.0 NCA 4000 NQA-1 certified supplier; B51, ASME Section XIII division 1, U-Stamp, ISO-9001 2015 and the company has been audited and approved by CANPAC as an approved vendor; we are also CSA N299.1 by OPG & I.S.C.R. Romania Certificate no. 2N/E10/8-2010 and are certified for the CNCAN quality system as well Chinese Nuclear Certification HAF 604.

Capabilities: F/M Catenary Flexible Piping Systems
• Non-metallic and metallic hose assemblies and connectors • Fueling machine flexible piping systems
• D2O primary and auxiliary system hose assemblies
• Quick couplings for Dry Break disconnect / connect applications • Bellows assemblies for main steam penetration • Bellows, Annulus Seal, Active Drainage, Fuel Rod Flask and Rod Cup Seal • Elastomeric and metallic expansion joints for RSW, CWC and CWS piping systems • Core Feeder Flexible Piping and Cryogenic Quick Couplings • Pipe Clamp Connectors.

Timken Canada LP dba Standard Machine

Using the latest generation design and manufacturing techniques, Standard Machine offers speed reducers to meet new applications or drop-in units to replace existing brands.

We design and manufacture a full line of high-quality gear reducers and speed increases including parallel shaft, right angle, planetary, worm and miter drives for virtually any application, including special and problem applications.

We currently have our trust brands (Hamilton Gear/Philadelphia Gear) that have been in service in the Reactor Fuel Transfer Systems for well over 30 years with no obsolescence.

TOMCO GROUP OF COMPANIES

TOMCO, known for our expertise in providing high-quality mechanical services and specialty equipment, can be relied upon as a strategic partner within the nuclear industry in Canada. Here are a few key points to consider.

1. Specialized Equipment and Services: TOMCO offers a range of specialized equipment such as hydraulic torque wrenches, portable machine tools, and hydrostatic testing systems. These tools are essential for the precise and safe maintenance of nuclear facilities.

2. Experience in High-Pressure Environments: With a strong background in industries like oil and gas, mining, and other forms of power generation TOMCO has the experience necessary to handle the high-pressure and high-stakes environment of the nuclear sector.

3. On-Site Machining and Maintenance: TOMCO provides on-site machining, CMM laser inspections, heat treating, and other various maintenance services. These capabilities are crucial for the upkeep and safety of nuclear reactors and other critical infrastructure.

4. Commitment to Safety and Innovation: TOMCO's long-standing record of safety and service excellence, combined with its drive to introduce innovative solutions, makes TOMCO a reliable partner to the nuclear industry in Canada.

Trenergy Inc.

Locally owned and operated, Trenergy is a specialty fabricator of Pressure Vessels, Package Boilers and custom steel components with capacity to manufacture a range of mechanical equipment, including SMRs, Steam Drums, Waterwall Panels, Surface Condensers, Superheaters, Economizers, Reheaters and other complex assemblies. Built in accordance with ASME, NBIC and TSSA requirements, Trenergy is qualified to fabricate, repair, alter, and register Power Boilers, Pressure Vessels, and Piping – both in shop and field. We have a skilled team of innovative problem solvers with an extensive QA program including a comprehensive NDE Division. Full-service machining is accessible through JTL Integrated Machine, an ISO 9001:2015 sister company. CWB certified to CSA welding standards and CSA N299.3 compliant for nuclear plants (Cat. 1,2,3,4). As a reliable sub-contractor for 'Fortune 500' companies, Trenergy is a trusted partner.

Trillium Flow Technologies

Trillium Flow Technologies designs and manufactures valves, pumps and associated equipment for the global power generation, oil & gas and industrial sectors. Trillium has a long history of supplying a comprehensive range of flow control solutions to the nuclear industry throughout the world for over 50 years. Our valves are industry renowned brands (Hopkinsons, Atwood & Morrill, Blakeborough, Autotork, Batley, Tricentric, Wolstenholmes, Hiller, Sarasin and Sevim), each with an established reputation for quality engineering and reliability.

Trillium designs and manufactures critical isolation and safety valves on the nuclear island to general isolation and control applications for balance of plants. Our aftermarket services cover valves, pumps and turbine drives for feed pumps and includes advanced parts supply and specialist coatings applications.

TW Metals - Nuclear Materials Solutions

TW Metals - Nuclear Material Solutions is a full line nuclear service center dedicated to the nuclear power industry. We can support the supply of ferrous and non-ferrous materials in the forms of bar, plate, sheet, structural shapes, pipe, tubing, flanges, fittings, fasteners, weld rod, rebar, castings and forgings. In addition, we can supply specialty Machine Components and Fabrications. TW also maintains a CRN for Mechanical Tube Plugs, Torq' N Seal®, for plugging of Nuclear Heat Exchangers and Condensers.

TW Metals maintains the highest nuclear accreditation with our Quality System Certificate, QSC-597. Our quality program complies with ASME III Division 1, 2 & 3, NCA3800, and Canadian Nuclear CSA Z299 requirements.

TW has supported the Canadian Nuclear Power Plants with critical components for Isolation Bulkhead & Seal plates, Shielding Support Frame, Nuclear castings and material that produce the end fittings, shield plugs, and lock springs, Associated Isolation Components, Heat Exchangers, and many more.

Tyne Engineering Inc.

Tyne Engineering has over 20 years experience in design and manufacture of high-cleanliness Skid-Mounted Process Systems, Glove Boxes, Radiation Monitoring Systems (RMS), and Nuclear Instrumentation. We have applied our skills to the supply of hydrogen, heavy water, and tritium systems, and to the supply of safety-related electronics and solutions for nuclear obsolescence applying Reverse Engineering and Commercial Grade Dedication (CGD/CGID). We perform R&D, conceptual and detailed design in all major disciplines, and are familiar with nuclear documentation for design, qualification, manufacturing, commissioning and operations. Tyne is a 50% owner in Prolet Nuclear Staffing Services.

Tyne has an extensive project management and nuclear quality assurance program compliant with Z299.1, N286.2, NQA-1, 10CFR50AppB, and ISO9001.

Certifications include N285.0, B51, ASME VIII, ASME III, B31.1, and B31.3 for which we provide our own stress analysis and welding of piping and pressure vessels.

UCC Industries International Inc.

As a leading supplier to the Canadian Nuclear Industry, UCC Industries International has been the number one choice for genuine Unistrut Metal Framing, Lindapter Steel Connections, and JCW TubeTrack and CableRace products for almost 30 years.

We only stock original, best-in-class products, and through our CSA N299.3 quality programs we ensure that our customers receive the items that they need when they need them, with professional service, guaranteed.

Our products, along with a great team of experienced and knowledgeable professionals, are assured to help you build with excellence.

Located in an 18,000 sq. ft. facility less than 2 km from the Pickering NGS, UCCI holds the largest inventory of our products in North America.

Conveniently servicing all contractors and engineering firms working with our neighboring power plants, we also offer "lunch and learn", personal delivery, and excellent service to bring the best to you, on time.

Ultra Torq Bolting Tools

We are a specialty supplier of controlled bolting equipment, pipe cutting & bevelling and tube tools to the fabrication and maintenance markets throughout Eastern Canada.

We offer sales, service & rental of hydraulic, pneumatic, battery, electric, servo controlled, and manual torque tools; hydraulic & mechanical bolt tensioners, pipe cutting & weld prep machines for industrial piping, orbital cutting & bevelling equipment, tube removal & installation tools for tubular pressure vessels.

New to our offering – Unigrind is a German based manufacturer of Portable & Shop based Valve machining & testing technology and a leader in high-speed grinding. The Unigrind product line includes valve grinding, lapping and turning machines, test stands and processes for resurfacing safety valves.

Services include application analysis, on site consulting, job site training, tool repair, calibration & certification and custom tool design for special applications.

Unified Engineering

Unified Engineering has been improving the lives of people and contributing to a safe sustainable environment by innovating and optimizing infrastructure assets for over 40 years. As an integrated engineering & manufacturing company we pride ourselves in delivering end to end solutions. At Unified Engineering, we can take complete responsibility for the entire scope on many design-build-install projects in full compliance with customer's requirements. We believe in forming synergistic partnerships with companies with complementary strengths to successfully deliver full scope turnkey solutions to our customers. Our projects portfolio includes a broad range of work covering obsolescence, robotic & pressure boundary welding, upgrades/modifications/retrofits to commercially available equipment and design/fabrication/integration testing of: intermediate level waste containers, 400T lifting beams, 20T flask material handling systems, mock-up simulators, refurbishment and decommissioning tooling and reactor-facing work platforms, shielding canopies and structural support assemblies. Working with our customers we assess manufacturability, material availability, scalability, and feasibility at the initial stages of a project. Hence, we streamline and optimize custom solutions throughout the subsequent design, build and test phases. Our testing capabilities include live load, helium leak detection and hydrostatic pressure testing.

UniTech Services Group, Inc.

UniTech Services Group, Inc. is the world's largest supplier of nuclear protective clothing and accessories. Our nuclear licensed decontamination facilities throughout the US and Europe provide: radiological laundering of protective clothing, decontamination and testing of respirators, and the decontamination of tools & equipment.

Using multiple U.S. processing facilities, we currently provide guaranteed, risk-free, full-service support to all major Canadian nuclear facilities. This includes: leased protective clothing, decontamination services, management of cross border transport and shipments (as well as the classification of materials for transport).

Our products and services are designed to provide our customers cost effective protection of their workers with minimal generation of radioactive materials. In particular, the implementation of our lease items at Canadian facilities has resulted in the elimination of 6.7M pounds of radioactive waste in the past 15 years.

Vacuum Products Canada Inc.

Vacuum Products Canada Inc. (VPC) is active in the field of medium, high and ultra-high vacuum since 1985. Beside sales and service of vacuum equipment and instruments, we are a service focused company. Based in Mississauga ON, Granby QC and Vancouver BC we cover the country coast to coast and also act Internationally.

VPC is a provider of equipment and services to the nuclear industry in Canada and in particular in Ontario since many years.

Through a strategic acquisition in 2018, VPC is also very present in the Non-Destructive Testing (NDT) field and focused on the Leak Testing (LT) method. As supplier of equipment and services to OPG, Bruce, Aecon, AtkinsRéalis, Candu, CNL, Kinectrics, BWXT, CurtissWright and many others, we are part of the NDT Testing processes in Canada.

Our personnel are ASNT NDT LT Level III and Level II and COFREND ISO9712 Level II certified. Member of ASNT, CINDE, NDTMA.

Valbruna ASW Inc.

Valbruna ASW Inc. (VASW) is the successor company to ASW Steel Inc. in Welland, Ontario. At this site predecessors of VASW have been at the center of many technological advancements throughout a history dating back 100 years and was prominent among suppliers of specialty steel to the first CANDU nuclear programs. In 2016 the company recognized an opportunity to participate in nuclear refurbishment projects and quickly shifted its focus back to this highly technical application.

The nuclear industry is a perfect fit for the facilities that VASW houses and the skills that its employees possess. The company is prepared to once again be a provider to this critical industry producing high quality stainless steel for use in the production of nuclear end fittings.

Our Quality Accreditations include: ISO9001: 2015/2014/68/EU, ISO17025: 2017 and we comply with NCA 3800.

WAG QA Services Canada Inc.

WAG QA Services Canada Inc. is a full service Quality Assurance /Quality Control Company specializing for over 20 years in the Canadian Nuclear Power Generation Industry. We have successfully provided our services to all Canadian Nuclear Utilities and their suppliers. WAG QA is an ISO 9001-2015 registered company.

Services include:

- QA/QMS Program development, support, assessment/audit; and supplier qualification audits (Manufacturers and Service providers). Programs include CSA N286, N285, N299; NCA 4000/NQA-1; ISO 9001. CSA N286, N299 and N285 expertise.
- Source surveillance/inspection/expediting of a wide range of mechanical and EI&C equipment world-wide.
- President serves on CSA N299 Committee.

These services are also provided to major non power generation Clients.

We also have offices in Shanghai serving Asia; Rio De Janeiro serving South America; and business representatives in Europe.

Worley Chemetics

Worley Chemetics: Driving Engineering and Fabrication Innovation for Nuclear Excellence
With over 50 years of nuclear fabrication expertise, Worley Chemetics' modern Pickering facility supports global energy transformation through advanced manufacturing and engineering. We deliver custom heat exchangers and pressure vessels certified to ASME Section III, Div. 1 & Div. 5 (N-type mark), supported by a CSA N299.1-compliant QA program. Our capabilities span thermal, mechanical, welding, and materials engineering, ensuring high-performance solutions for SMR, MMR, and advanced reactor projects. Together, Worley and Worley Chemetics provide a comprehensive suite of nuclear services across all phases—design engineering, licensing, training, operations and maintenance, project management, and fabrication. This synergy drives technical excellence and innovation, strengthening supply chains and fostering collaboration to meet the growing demand for nuclear energy solutions locally and globally.

ENERGIZING OUR FUTURE

**Ensuring energy security and accelerating
a sustainable clean energy transition.**

For over 100 years, NB Power has been proud to deliver safe, reliable, sustainable and cost-effective electricity. Today, NB Power is responsible for the generation, transmission and distribution of electricity that powers the homes, businesses and communities of more than 400,000 customers.

The company maintains one of the most diverse generation fleets in North America, which includes the **Point Lepreau Nuclear Generating Station**, the only nuclear facility in Atlantic Canada.

NB Power is currently 80% non-emitting and is committed to a vision of sustainable energy for the future. To continue to deliver safe, reliable, sustainable, and cost-effective electricity to our customers as we decarbonize, NB Power is continuing to integrate renewable and non-emitting generation. This includes working toward getting new nuclear on the grid to help meet net-zero electricity goals while ensuring energy security for generations to come.

NB Power is also exploring the potential of safe, efficient isotope production at Point Lepreau – representing an opportunity to contribute to global health care and support cancer diagnosis and treatment around the world.

One of the pillars of NB Power's strategic approach focuses on building relationships both internally and externally with First Nations groups and communities through meaningful engagement.

HOOPER

Engineered for **Nuclear-Grade Equipment Supply**

HOOPER WELDING

delivers high-integrity equipment and fabricated systems for nuclear power generation - where safety, traceability, and precision are non-negotiable.

For more than seven decades, Hooper Welding has supported safety-critical nuclear systems with uncompromising quality. Our facilities, people, and processes are purpose-built to meet the most rigorous nuclear requirements, from complex pressure-retaining components to large-scale fabricated assemblies. Operating under ASME Section III and CSA N285 programs, Hooper Welding combines advanced welding technologies with a culture rooted in nuclear safety to support refurbishment and new-build projects.

As a certified materials organization, Hooper Welding is qualified to supply ASME Section III source materials, providing full material control, traceability, and documentation under a single integrated quality program. **HOOPER WELDING** - delivering nuclear-grade solutions built for decades of service.

HOOPER WELDING

Canadian Radiation Protection Association (CRPA)

The objective of the Canadian Radiation Protection Association (CRPA) is to advance the development and communication of scientific knowledge and practical means for protecting people and the environment from the unlikely, yet potentially harmful, effects of radiation exposure, while acknowledging that the safe and optimal use of radiation is for the benefit of all society.

These are exciting times for radiation protection professionals. New radiation treatment modalities for fighting cancer and advanced imaging systems are being developed continuously. Nuclear power industry is exploring next-generation reactors and small modular reactor designs to reduce the global carbon footprint.

Carpenters Regional Council (CRC) UBC Local 2222

As a supplier of skilled labor for the refurbishment of Ontario's Nuclear fleet the Carpenters Regional Council (CRC) would like to ensure we are at the forefront of information relating to the industry. In addition, our insight into labor supply challenges and needs will be a valued asset to the organization. Collectively we can ensure the successful completion and investment in the future of Ontario's refurbishment efforts along with potential new projects needed to power Ontario for decades to come.

City of Owen Sound

The City of Owen Sound is located on the southern shores of Georgian Bay in a valley below the sheer rock cliffs of the Niagara Escarpment. Owen Sound is characterized by a magnificent harbour and bay, two winding rivers, tree-lined streets, an extensive parks system, and tree-covered hillsides and ravines, which are home to a wide variety of flora and fauna.

Owen Sound is the largest urban community in Grey and Bruce Counties, which combined represent a primary commercial market of 158,000. Owen Sound is the seat of the County of Grey government, and is the location for a number of regional, provincial and federal government offices. There are twelve elementary schools, three secondary schools, and six private schools in addition to a Georgian College campus.

Corporation of the County of Bruce

The nuclear industry centered around Bruce Power, the world's largest operating nuclear power plant, is vital to Bruce County's economy. With over 60 nuclear suppliers in the area, the industry demonstrates resilience and diversity, offering a range of products and services. Bruce Power's ongoing major component replacement program will ensure operations until 2064, solidifying the region's leadership in nuclear technology. This industry's presence fosters economic prosperity and environmental responsibility, complementing the area's agricultural and tourism sectors. The relationship between nuclear energy and other major industries such as agriculture and tourism create a harmonious environment for sustainable growth. Agriculture benefits from the fertile landscape, while tourism thrives on attractions like pristine beaches and scenic hiking trails. Together, these sectors contribute to a balanced and vibrant future for Bruce County, where economic, environmental, and social interests intersect positively.

County of Renfrew

The County of Renfrew is the upper-tier host community for Canadian Nuclear Laboratories (CNL), located in Chalk River.

As the birthplace of Canada's nuclear industry, the County of Renfrew has a proud history of being home to the country's first nuclear power plant – the Nuclear Power Demonstration (NPD) – commissioned in 1962 in Rolphton. This led to the development of more than 20 CANDU reactors in Ontario, Québec and New Brunswick.

The County also hosts several other nuclear industry members such as Bubble Technology Industries, SRB Technologies, BWXT Nuclear Energy Canada and OCNI member, Nu-tech Precision Metals.

As the approved future site of the Near Surface Disposal Facility (NSDF), the County of Renfrew offers a diversified workforce and supplier network to support this new development.

Creative Fire LP

Creative Fire is a 100-percent Indigenous-owned National full-service communications and advertising agency specializing in the nuclear, energy and resources industry. Creative Fire is a purpose-driven company. We are owned by Des Nedhe Development Corporation which is the economic development arm of English River First Nation. Creative Fire offers the following services: Communication strategy, Corporate Reporting, Indigenous Engagement, Research and Data Analytics, Design, Media planning, Social/ digital media management, Web development, Media Relations, and Event planning and management. Established in 2000, Creative Fire have produced award-winning work with Canada's largest and most successful companies, not for profit organizations, associations and institutions. Our goals are to create new opportunities for Indigenous workers and suppliers; to operate profitably to benefit English River First Nation; to support Indigenous people and companies connected to our industry; and to have a positive impact in our communities. We deliver high-quality work efficiently, effectively and safely.

Humber Polytechnic

Humber Polytechnic has a deep and growing interest in supporting Canada's nuclear industry through workforce development, applied research, and innovation.

We recognize that Canada is entering a new phase of nuclear energy development, particularly with the deployment of Small Modular Reactors (SMRs) and expanded CANDU maintenance and refurbishment activities. Our institution is committed to helping meet the growing demand for highly skilled professionals who understand both traditional nuclear systems and emerging technologies.

Innovation Cluster - Peterborough and the Kawarthas

The Innovation Cluster is a non-profit business accelerator based in Peterborough, Ontario, that supports small and medium-sized enterprises (SMEs) and skilled trades across southern and eastern Ontario, with a focus on nuclear and energy markets. Through integrated mentoring, training, and skill-building programs, the Cluster helps MVP+ entrepreneurs move from early market validation to commercialization and scalable, profitable, and sustainable growth.

For Ontario's nuclear and clean energy ecosystem, the Cluster delivers targeted programming that strengthens both workforce capacity and supplier readiness. Its flagship BuildUP program prepares new and experienced skilled trades professionals to launch and grow their own businesses to serve nuclear, infrastructure, and energy markets. Participants gain technical awareness, business fundamentals, and direct connections to industry opportunities.

International Brotherhood of Boilermakers

Boilermakers have been plying their trade since the industrial revolution and the growth of steam power. Growing and adapting to the changing industrial landscape, our Brotherhood has become a vibrant union of 50,000 members across North America. Boilermakers are highly skilled tradespeople who build, repair, and test all types of boilers, tanks and pressure vessels. The scope of a Boilermaker's work can include everything from specialty welding to hoisting, positioning and installing massive industrial plant components. Boilermakers work in the energy industry, building and maintaining nuclear, hydroelectric and fossil fuel generating stations. Amongst the myriad projects in which Boilermakers are making their mark, we are currently engaged in the refurbishment of the Darlington and Bruce Nuclear power stations in Ontario. These multi-billion-dollar upgrade projects are expected to provide work for our members for the next ten years and will allow the plants to operate, with increased efficiency for decades to come.

**Radiation Safety
Institute of Canada**
Institut de radioprotection du Canada

Radiation Safety Institute of Canada

Founded in 1980, the Radiation Safety Institute of Canada (RSIC) is a national organization dedicated to promoting and advancing radiation safety in the workplace, in the environment and in the community. Our commitment to the principle of “Good science in plain language” underpins everything we do. The Institute is unique in Canada: it is the only not-for-profit organization, independent of industry and government, which works to promote radiation safety in the workplace, home and environment.

The Institute offers a broad range of educational, technical, and scientific services to businesses, government organizations, health care providers, communities, and individuals across Canada and around the world. The institute’s unbiased information service receives hundreds of calls and e-mails every year for information and assistance on workplace radiation questions. The RSIC is incorporated under the laws of Canada as a not-for profit corporation and is also a registered charity (CRA# 106861511RR0001).

Technical Standards & Safety Authority

As Ontario’s technical safety regulator, the Technical Standards and Safety Authority (TSSA) works collaboratively with industry and government to reduce safety risks within its regulated industries to enhance public safety in the province.

TSSA is Ontario’s sole authorized inspection agency (AIA) for nuclear pressure-retaining equipment, designated by the Canadian Nuclear Safety Commission (CNSC). As an ASME and National Board-certified AIA, TSSA inspects new manufacturing, repairs, and alterations for nuclear components.

TSSA’s nuclear work includes fabrication, installation, periodic inspections, repairs, and engineering services, as the only organization with the expertise and authority to perform these critical inspections at Ontario’s nuclear stations and suppliers.

It also contributes to nuclear standards development, small modular reactor (SMR) initiatives, and evolving BPV regulations to enhance nuclear plant reliability.

The Georgian College of Applied Arts & Technology

Georgian College develops the skilled workforce needed for the energy sector to thrive through teaching, applied research, industry collaboration, and community capacity building. We prepare graduates for careers in nuclear, hydrogen, pumped storage, renewables, and isotope production.

Our Owen Sound campus offers programs aligned with industry needs, including Power Engineering Technology with nuclear-focused courses, co-op placements, and CET eligibility. We train 750+ apprentices annually in millwright, electrical, welding, carpentry, and boilermaking, many of whom work in nuclear. Georgian has 110+ programs, including engineering, industrial design, project management, supply chain, AI, and cybersecurity.

A leader in workforce localization, Indigenous engagement, and XR-based training, we offer micro-credentials in automation, robotics, machining, and leadership, plus a Project Controls & Cost Engineering micro-certificate in partnership with Sargent & Lundy, Bruce Power, OPG, and AACE. Our Research and Innovation team supports technology adoption, upskilling, and sector-driven problem-solving.

The Regional Municipality of Durham - Invest Durham

Durham Region is the Clean Energy Capital of Canada. Durham Region produces approximately 30 per cent of Ontario's electricity and is a recognized energy cluster. Durham's two nuclear generating stations in Pickering and in Clarington set that cluster in motion. Out of the 22 Candu reactors in the country, 12 are located in Durham Region, and have a combined generating capacity of approximately 6,600 megawatts. Representing a full spectrum of the energy cycle, Durham's skilled labour force, transmission capacity, and infrastructure are supported by research and development opportunities, along with specialized training and educational programs to make this a major energy cluster in North America. An innovative climate and established energy networks, in addition to opportunities for collaboration with government and educational institutions, make Durham Region an ideal location for the development of energy solutions.

Tron Construction and Mining LP

Tron Construction & Mining Limited Partnership (Tron) is a 100% Indigenous owned, multi-trade construction service provider. Tron has been safely and successfully self-performing a broad range of projects in the nuclear, power, industrial, utility, mining and renewables sectors.

Tron's four pillars of execution success are safety, quality, schedule, and optimum performance. Our client-centric approach allows us to build true partnerships by focusing on developing strategic long-term relationships with clients and vendors.

Creating opportunities for Indigenous businesses and people is an essential step for a stronger Canada. Tron has brought experience in developing training and employment models that create Indigenous opportunities and comply with industry and government requirements.

Within the Des Nedhe group companies, Tron has developed a collaboration model and framework to engage other Indigenous organizations that delivers collective strengths to the delivery of solutions to industry.

UNENE - University Network of Excellence in Nuclear Engineering

The University Network of Excellence in Nuclear Engineering (UNENE) is a Canadian based alliance of universities, nuclear power utilities, research and regulatory agencies for the support and development of nuclear education, research and development capability in Canadian universities. UNENE was established as a not-for-profit corporation in 2002. UNENE is now a well-established and fully functional framework with programs mainly focusing on education and research, serving the industry at large. The educational component is in the form of both professional development courses and academic M. Eng. and Graduate Diploma programs, catering to working nuclear professionals by being offered on weekends and using distance learning tools. It is intended to enhance competencies and build knowledge for students. The R&D programs are led by UNENE endowed Industrial Research Chairs (IRCs) and other prominent researchers, in areas of importance to the industry.

Work-Based Learning Consortium

WBLC is a training and workforce development solutions provider. Our work is focused on the advanced manufacturing sector which is a significant supplier to the nuclear industry.

WBLC develops and delivers industry supported hybrid training programs that include e-learning as well as hands-on, shop floor, practical training and have a success rate of over 90% in all our offerings. We continually collaborate with experts in the sector, and ensure that our training is up-to-date, relevant and meets the current and specific needs of industry.

The training model utilized by WBLC is particularly efficient as it can be completed in twelve weeks, making it 50% shorter than comparable training methodologies, and it provides a much greater return on investment. The program can be structured for new hires – including the hiring process – and for the upskilling of existing workers. Please see our website for more details.

Assystem Energy & Infrastructure Limited

Assystem, one of the world's leading independent nuclear engineering companies, is committed to accelerating the energy transition. With more than 55 years of experience in highly regulated sectors with stringent safety and security constraints, the Group provides engineering and project management services as well as digital solutions and services to optimise the performance of complex infrastructure assets throughout their life cycle. In its 12 countries of operation, Assystem's 8,000 experts are supporting energy transition. To achieve an affordable low carbon energy supply, Assystem is committed to the development of low carbon electricity (nuclear, renewables and electricity grids) and clean hydrogen. The Group is also helping drive the use of low carbon electricity in industrial sectors such as transportation. Assystem is currently ranked in the top three of nuclear engineering groups in the world.

Conuar S.A.

CONUAR, a specialist in machined and welded nuclear components, is one of the leaders in the global nuclear industry with more than 40 years of experience.

CONUAR manufactures end fittings, shield plugs, channel closures, calandria tubes, pressure tubes and other critical components and tooling for CANDU reactors.

At the same time, CONUAR manufactures heat exchangers, SMR helical steam generators and seamless instrumentation and steam generators tubing in stainless steel, duplex zirconium and nickel alloys such as 800, 825 and 690.

Our technical excellence is backed by ISO 9001, 14001 and 45001 certifications.

In addition, CONUAR operates under an ASME certified quality program, 10CFR50 Ap B and 10CFR21, complying with the strict standards of ASME BPVC Section III and CSA N285 and N299.

EDF SA

EDF is the world largest nuclear fleet operated by a single operator, with 66 reactors in operation worldwide.

EDF has been operating nuclear reactors since 1963, and is a leader in reactor design, maintenance, operations, R&D, electricity transport and distribution.

EDF has over 167 000 employees and serves more than 40 million customers.

EDF is committed to providing low carbon energy through its assets established in France, the United-Kingdom (EDF-Energy), Italy (Edison) and Belgium (Luminus), and various projects in approximately 50 countries.

EDF has a long-term presence in the energy sector in Canada, in particular nuclear energy through Framatome Canada and Arabelle Solutions, as well as EDF Renewables.

EDF provides a suite of technologies built on over half a century of experience, such as the EPR, EDF's flagship nuclear reactor.

Glenair Inc.

Glenair is a privately-owned manufacturer that was established in 1956 in Glendale California. Our global head office and principal manufacturing facilities of 2.4 Million sq ft is in Glendale CA, we also manufacture at our plants in Mansfield UK and Bologna Italy. We presently have approximately 5000 employees globally, including our global sales force.

Our primary products are metal and composite connectors and related accessories, complex cable assemblies, fiber optic connectors and assemblies, metal and polymer conduit, media convertors and flex circuits. All are designed and manufactured by Glenair in house specifically for harsh environments such as commercial aerospace, military aerospace, space, weapon systems, oil & gas, passenger rail and of course nuclear.

Glenair has manufactured products for the nuclear industry for over 30 years, our products have been successfully qualified by our clients to various global safety levels.

Hardcoats India Private Limited

Hardcoats India Pvt. Ltd., established in 1990, is a globally oriented manufacturer of high-end components and precision-engineered parts produced from a wide range of exotic and high-performance materials. With over three decades of proven experience, we specialize in delivering reliable, safety-critical solutions for demanding applications in the nuclear, power generation, cryogenic, and heavy engineering sectors.

We manufacture precision components for a wide spectrum of nuclear reactor technologies, including Pressurized Heavy Water Reactors (PHWRs), Light Water Reactors (LWRs), Boiling Water Reactors (BWRs), and Fast Breeder Reactors (FBRs). Our deep understanding of these reactor systems enables us to meet the stringent functional, safety, and regulatory requirements associated with each technology.

RSCC Nuclear Cable

RSCC Wire & Cable, LLC is the premier full line manufacturer of Nuclear Safety cables to the nuclear industry. Cables have been provided worldwide, servicing the industry continuously for over 50 years. In addition to Firewall III®, our flagship Low Voltage product line, we now offer PermaLife™ Nuclear Qualified Medium Voltage Cables. RSCC Wire and Cable, LLC prides itself on innovated cable solutions to support the global nuclear power industry. In doing so, RSCC Wire and Cable, LLC provided the world's first nuclear qualified Fiber Optic Cable to the Canadian Nuclear Market in 2018. The qualification was performed at RSCC using its in house LOCA Chamber, and the expertise of its research and development lab. RSCC looks forward to using these resources to support the nuclear industry, wherever needed.

Schulz Electric, Power Systems by Timken

HnicElectric is the preferred safety-related motor repair facility in the nuclear power industry, offering decontamination, engineering, and repair services in one building. Hnichas performed work for every nuclear utility in the United States, Canada, and Mexico. This work has included supplying new large EQ safety-related motors, performing contaminated motor repair, repairing and testing MOV motors, EDG pole, and stator rewinds, and repairing or replacing safety-related gearboxes.

HnicElectric offers environmentally qualified form and random-wound insulation systems that meet requirements of 10CFR50.49. Our random-wound EQ insulation systems include inside containment, intermittent duty (MOV), and continuous duty radiation-only qualified configurations.

Hnichas environmentally qualified low smoke, zero halogen (LSZH), medium voltage motor lead wire rated up to 6.9kV, when used with HnicElectric's form-wound EQ motor insulation system.

Sheffield Forgemasters

Sheffield Forgemasters has played a critical role in the UK's nuclear industry for decades, providing critical expertise in ultra-heavy steel forgings and castings for both civil and defence applications. Since the 1950s, we have produced nuclear grade components such as reactor pressure vessels, steam generator shells, and transport casks.

In recent years, we have focused on advancing civil nuclear technology, particularly through collaborations on SMRs. We have signed MOUs with Rolls-Royce SMR and Holtec Britain to supply major forgings for their upcoming SMR designs. We have also regained our ASME nuclear accreditation, allowing us to produce and fabricate safety-critical components for civil nuclear power plants.

A key innovation for Sheffield Forgemaster has been our use of local electron beam welding (LEBW) to create a full-scale SMR pressure vessel demonstrator in under 24 hours- a process that traditionally takes months. This breakthrough highlights Sheffield Forgemasters' commitment to driving faster, more cost effective nuclear manufacturing and ensuring the UK remains a global leader in advanced nuclear engineering.

Tioga Pipe

Tioga is a global supplier of piping components, both nuclear, safety-related and non-nuclear. Our products include pipes, tubing, fittings, flanges, plate, sheet, bar, beams, angles, fasteners, forgings and machined parts. Our nuclear certified warehouse is located in Forks, PA. Stocking alloys include carbon, stainless, chrome-moly and low-temperature. Current size range is 1/8 inch to 30 inch diameter, all wall schedules and up to 4 inch thickness in some sizes. Tioga has maintained QSC-467 (MO) since 1982 and our QA Program is certified to ASME NCA-3800, Section III, N45.2, NQA-1, 10CFR50 Appendix B and N299 Series. We have been audited by NUPIC and NIAC. Our certified in-house lab can perform destructive and non-destructive testing giving us the capabilities to upgrade and dedicate unqualified source material. In addition, Tioga maintains CRN s for fittings and flanges. We offer 24/7 /365 emergency service. Tioga is currently supplying OPG, Bruce Power, B&W, ES Fox, AECON, SNC-Lavalin, Hooper Welding and Mirion.

Urenco Ltd.

Urenco is an international supplier of uranium enrichment services, fuel cycle products and related solutions. Operating in a pivotal area of the nuclear fuel supply chain for more than 50 years, we support energy security globally by facilitating the reliable delivery of low carbon electricity generation for consumers around the world.

Through our technology and the expertise of our people, Urenco provides safe, cost effective and reliable services, operating within a framework of high environmental, social and governance standards, that complement international safeguards.

The CNIC's Isotopes for Hope campaign is focused on:

- ▶ Expanding **Canada's global isotope leadership**
- ▶ **Raising awareness** for the pivotal role that isotopes play in everyday life
- ▶ Meeting our ambitious vision to **double Canada's production of isotopes** by 2030

The Impact of Canadian Isotopes:

Global Growth

The global nuclear medicine market is expected to reach up to **\$42 billion US** by 2033.

Combating Cancer

Nuclear medicine physicians estimate that they can **cure more than 60% of cancers** if caught in time.

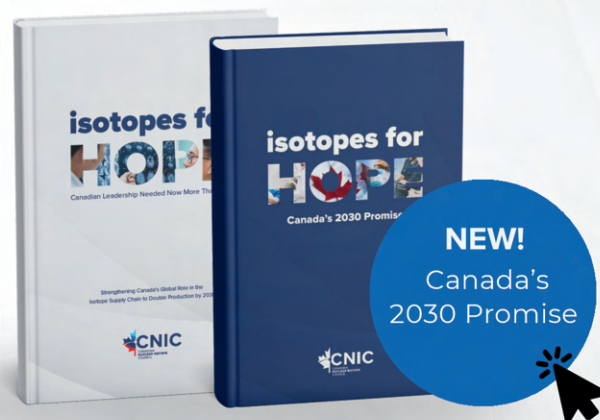

Patient Impact

Improving access to better imaging and treatments could prevent **9.6 million deaths** worldwide by 2030.

Economic Impact

Radioligand therapies could contribute up to **\$4-6 million CAD** in national economic value by 2030 by reducing hospital wait times and the need for hospital resources, lessening side effects, and getting people back to their lives and employment sooner.
