

Domenica Macasevic

Domenica Macasevic is the Regional Sales Manager for Flowserve Corporation, bringing nearly 20 years of experience in Canada's nuclear industry. Throughout her career, she has focused on supporting Ontario's nuclear fleet, working closely with Ontario Power Generation (OPG), Bruce Power, and key supply chain partners to deliver nuclear-qualified valves, seals, and engineered solutions. Having worked for four OCNi member companies, Domenica has developed a broad understanding of the Canadian nuclear supply chain and the unique requirements of utilities, suppliers, and regulatory stakeholders. Her experience spans business development, customer relations, strategic account management, and supplier performance, giving her valuable insight into the opportunities and challenges facing the industry. Domenica previously served on the OCNi Board of Directors from 2019 to 2022, where she contributed to advancing the organization's mission of supporting and strengthening Canada's nuclear supply chain. She remains actively involved in OCNi initiatives and events and has built strong relationships throughout the nuclear community. Most recently, the team she supports was recognized with a Bruce Power Supplier Excellence Award for Quality, reflecting a strong commitment to operational excellence, customer satisfaction, and continuous improvement. Following the acquisition of Trillium Flow Technologies' valve division by Flowserve Corporation, Domenica has also been involved in supporting Flowserve's commitment to growing its presence in Canada and expanding opportunities for Canadian manufacturing and supply chain participation. A passionate advocate for the Canadian nuclear industry, Domenica is committed to fostering collaboration among utilities, suppliers, government, and industry organizations. She believes that a strong, innovative, and competitive domestic supply chain is essential to supporting Canada's nuclear growth and clean energy future. Domenica's combination of industry experience, previous Board service, collaborative leadership style, and extensive industry network positions her to make a meaningful contribution to OCNi and its membership.

I am seeking election to the OCNi Board of Directors because I am passionate about the strength, growth, and long-term success of Canada's nuclear supply chain. Having spent nearly 20 years supporting Ontario's nuclear industry, I have had the opportunity to work closely with utilities, suppliers, and industry partners to understand both the opportunities and challenges facing our sector. As Canada enters a period of significant nuclear growth, including refurbishment projects, new nuclear development, and expanding clean energy initiatives, I believe OCNi has an increasingly important role to play in ensuring Canadian suppliers remain competitive, innovative, and well-positioned to support the industry's future needs. If elected, I will strive to: Advocate for the continued growth and development of the Canadian nuclear supply chain. Support initiatives that strengthen collaboration between utilities, suppliers, government, and industry stakeholders.

Promote opportunities that increase Canadian content and manufacturing capabilities. Help ensure members have access to meaningful networking, business development, and knowledge-sharing opportunities. Encourage the development of the next generation of nuclear professionals and suppliers. My perspective is shaped by experience across multiple OCNl member organizations and a career dedicated to serving OPG, Bruce Power, and the broader nuclear industry. I have previously served on the OCNl Board and understand the value of strong governance, strategic planning, and member engagement. I also bring a practical understanding of supplier challenges, customer expectations, and the importance of building a resilient and sustainable supply chain. Most importantly, I am committed to being an active, collaborative, and engaged Board member who listens to the membership and works in the best interests of the organization and the industry we serve. I would be honored to contribute my experience, energy, and commitment to help OCNl continue strengthening Canada's position as a global leader in nuclear energy and nuclear supply chain excellence.
