

Emma Hauch

After graduating from the University of Queensland, Australia with a Bachelor of Chemical Engineering, I completed my Master of Applied Science at the University of Waterloo, Canada. Following my graduate studies, I entered the nuclear industry and have been fortunate to enjoy over 20 years in this industry in a variety of roles, experiences, and corporations. First starting at SNC Lavalin Nuclear as a project engineer working on Balance of Plant for Refurbishment, to now as CEO of Nuvia Canada. In between spending over a decade at Kinectrics and several years at ATS Automation, I was fortunate to be exposed to a number of areas unique to the nuclear industry. Whether that was as a project manager for commercial grade dedication, environmental and seismic qualification, as a leader of the day to day operations of a chemical and radiochemical analytical laboratory or in a sales and business development role. Ultimately, my journey led me to the privilege of serving as CEO of Nuvia Canada where we are building upon our strong reputation in the Canadian nuclear industry by developing and growing our team during this unprecedented time for the industry. During my career I also served on the Women in Nuclear, Canada executive board for several years as Secretary and am currently seeking re-appointment to the board of OCNI for my second term.

I am pleased to seek re-election to the OCNI Board of Directors for a second term. Serving on the OCNI Board has been a privilege and has reinforced my belief that a strong, collaborative and innovative nuclear supply chain is essential to Canada's clean energy future. As Chief Executive Officer of NUVIA Canada, I am deeply committed to advancing our industry and ensuring Canadian supplier organizations are positioned to capitalize on the unprecedented opportunities before us. The Canadian nuclear sector is entering a period of remarkable growth and transformation. Investments in refurbishment projects, SMRs, New Builds, medical isotope production and decommissioning activities are creating new opportunities across the supply chain. At the same time, the industry faces challenges related to workforce development, productivity, innovation and supply chain resilience. OCNI plays a critical role in helping member organizations navigate these opportunities and challenges while ensuring Canada remains a global leader in nuclear excellence. Throughout my career, I have held leadership roles spanning business development, operations, strategic planning and organizational growth. Today, as CEO of NUVIA Canada, I am responsible for advancing the company's strategy, driving sustainable growth and supporting our teams that deliver critical services across Canada's nuclear industry. This experience provides me with a broad perspective on the priorities of suppliers, utilities and industry partners. Previously, I have served two terms as an Executive Board Member and Secretary for Women in Nuclear Canada. During that time, we successfully transitioned the organization to a registered not-for-profit, significantly

expanded membership, strengthened industry engagement and advanced diversity and inclusion across the sector. Those experiences reinforced the importance of strong governance, strategic focus, stakeholder engagement and measurable outcomes, principles that I continue to bring to my work with OCNI. During my first term on the OCNI Board, I have had the opportunity to contribute to initiatives that strengthen our industry's voice and promote the capabilities of Canada's nuclear supply chain. If re-elected, I will continue to advocate for practical initiatives that deliver value to members, including supply chain development, workforce attraction and retention, and opportunities for ongoing business relationships and new partnerships. I believe strongly that OCNI's greatest strength is its membership. By working together, we can help ensure that Canadian nuclear companies remain competitive, innovative and well-positioned to support the continued growth of nuclear energy in Canada and around the world. I would be honoured to continue serving alongside my fellow Board members and supporting OCNI's mission on behalf of its members. I respectfully ask for your support and look forward to helping guide the organization through this exciting period of growth and opportunity for our industry.
