

Mimi Ginger Wilde

Mimi has 15+ years of experience in the nuclear industry including roles in design engineering, operations and maintenance (O&M), product development testing, project and engineering management, and business development. She has worked closely with a variety of clients and their construction partners to support the development and revitalization of sites as a system engineer, project lead, engineering manager, and account manager. She is currently the Global Director, Energy Client Operations, leading a team focused on improving asset management, maintenance, and performance of key energy infrastructure. Mimi is passionate about supporting the next generation of nuclear professionals; she is a founding member and previous president of the Chalk River chapter of NAYGN and is currently on the Board of Directors for the OCNI. She is also a licensed Professional Engineer in Ontario.

I am seeking re-election to the OCNI Board of Directors to continue supporting the growth, competitiveness, and long-term success of Canada's nuclear supply chain during a period of unprecedented industry expansion. As a current OCNI Director, I have been proud to actively serve our members as Chair of the Elections Committee in 2025 and Treasurer in 2026. These experiences have strengthened my understanding of OCNI's governance and strategic priorities while reinforcing my commitment to delivering value for our membership. With more than 15 years of experience spanning engineering, project delivery, business development, and executive leadership in the nuclear sector, I bring a broad perspective on the challenges and opportunities facing our industry. Through my work at Hatch and across the Canadian nuclear community, I have developed a deep appreciation for the importance of supply chain capacity, workforce development, innovation, and strong industry advocacy. Through my previous role as Chapter President for North American Young Generation in Nuclear (NAYGN) and as a current mentor, I am passionate about developing the next generation of professionals. If re-elected, I will continue to work collaboratively with fellow members, Directors, and OCNI leadership to advance initiatives that support Canadian businesses, strengthen our workforce, and position our supply chain to succeed in both domestic and international markets.
