

Vinod Chugh

Vinod Chugh, P.Eng., is Founder & President of Power Generation Integrated Consulting Ltd. and brings more than 36 years of leadership across the nuclear lifecycle, CANDU/PHWR operations and refurbishment, advanced reactors, regulatory oversight, engineering governance, supply-chain readiness, and clean-energy strategy. His experience includes NPCIL, Kinectrics, Ontario Power Generation, Bruce Power, Kairos Power, Moltex Energy, AtkinsRealis/Candu Energy, BWXT and TSSA. A former OCNi Board Director, he served on the Oversight and Nominations & Elections Committees and now contributes to OCNi's 2026 Supplier Excellence Awards Committee. Vinod is an Ontario P.Eng., a former Vice-Chair of CSA N290, an ASME nuclear-industry contributor, and a UNENE/EHRC course developer and instructor. Through PGI, he advises utilities, developers, suppliers, investors, and technology companies on practical nuclear deployment, governance, workforce development, and execution.

I am seeking election to help OCNi members convert Canada's nuclear momentum into durable work, stronger capabilities, and global opportunity. Having previously served on the Board and its Oversight and Nominations & Elections Committees, I understand the discipline required of a director and the importance of constructive, member-focused governance. When I accepted a regulatory leadership role at TSSA, I stepped aside to avoid even a perceived conflict. With that role concluded and PGI re-established as a full member in good standing, I am ready to serve again with full independence and commitment. If elected, I will focus on practical access to opportunities for small and mid-sized suppliers; stronger vendor readiness, quality, workforce, and knowledge-transfer programs; better connection among utilities, developers, regulators, and the supply chain; and positioning Canadian capability for CANDU refurbishment, new nuclear, SMRs and advanced reactors, and international markets. My 36 years across operating fleets, refurbishment, first-of-a-kind reactor development, regulation, and advisory work give me a broad, execution-oriented perspective. I will listen carefully, speak candidly, and work collaboratively to strengthen OCNi's governance, member value, and advocacy.
